

COPYRIGHT VERIFICATION FOR REPRODUCED/MODIFIED MATERIALS

Ms. no. (*required*) _____ Staff Use: Issue _____

Complete all sections:

1. The following figures, tables, video, etc.: [] all, [] none, or [] figure numbers _____ are original. These do not require permission from any copyright holder to be included in my paper. I understand I retain copyright to the materials but, via the Licensure agreement with MSA, MSA has been granted the same rights as a copyright holder.
2. The following figures, tables, video, etc.: [] all, [] none, or [] figure numbers _____ are from other copyrighted or published sources or works but are modified to include material added from our paper (data, calculated, trends, etc.) to illustrate the points of our paper which makes it a transformative use (repurposing, recontextualizing, etc.) under the fair use. Materials from other copyrighted or published sources or works that have no added information from our work or to which we have made only slight formatting modifications, require permission and are covered in #3 below. (MSA cannot provide legal advice. We recommend consulting with your institution about copyright and fair use.)
3. The following figures, tables, video, etc.: [] all, [] none, or [] figure numbers _____ are reproduced in their entirety or with formatting differences from other copyrighted or published sources or works and require permission from the copyright holder to reproduce with my paper. It is my responsibility to obtain the permission(s) needed and send MSA a copy of the permission(s).

Please send us an electronic (editorial@minsocam.org) or print copy (fax +1 (703) 652-9951) of the written permission from the copyright holder to use said figure/item in your paper. We will need this before MSA can publish your work. This could include your own figures, used in a publication to which you assigned the copyright of your work.

4. Please ensure on the proof of the paper that all captions properly credit the original source as necessary.

Your Signature

Your Printed Name

Date

Thank you.

Sincerely,

American Mineralogist/MSA
