Table 3. Final observed and calculated structure factors
for all data sets.

(for deposit)

Haddam 300 K (part 1)

Table with multiple columns of numerical data and sub-headers (e.g., H,0,0; H,7,0; H,15,0; H,17,0; H,1,1; H,2,1; H,10,0; H,9,1; H,10,1; H,11,1; H,12,1; H,11,1; H,13,1; H,13,1). Each sub-header is followed by a list of numbers, some with asterisks. The table is organized into a grid-like structure with sub-headers and corresponding data rows.

Haddam 300 K (part 4)

Table with multiple columns of numerical data and categorical headers (e.g., H,5,10, H,14,10, H,0,14). Each header is followed by a list of numbers and their corresponding values. The table is organized into several distinct sections based on these headers.
