

Figure S1. Reflected-light image of a cut and polished chip of SM3. The chip was dry cut and polished. The three red boxed regions correspond to regions discussed in the text - box 1 (Fig. 1), box 2 (Fig. 2), and box 3 (Fig. S2). The red arrow points to a blue Ca-Cl-S grain. The white arrow indicates a large porphyritic olivine chondrule.

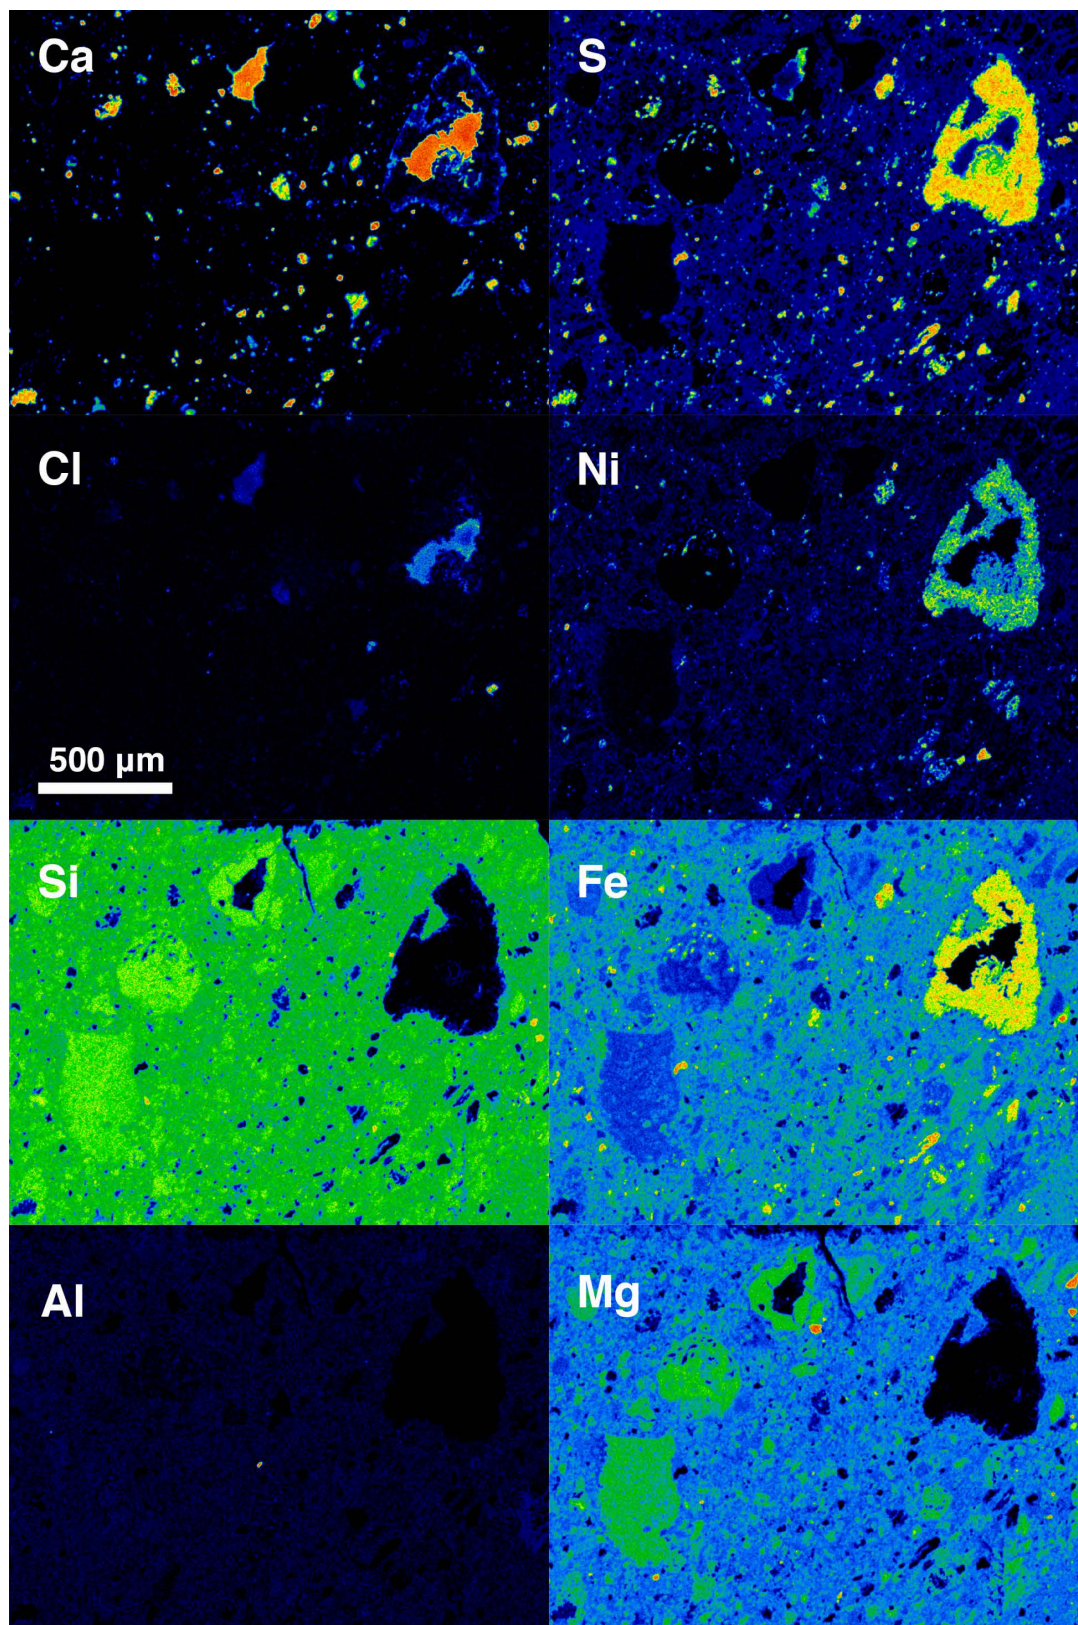

Figure S2. Elemental maps of boxed region 3 from Sutter's Mill, SM3 in Fig. S1.
