

Deposit item AM-14-414 American Mineralogist, April 2014, Ferrari et al.: High-T emissivity and thermal expansion of C2/c pyroxenes

SUPPLEMENTARY FIGURE 1. Powder X ray diffraction of DiMDCV sample (upper) and HeE0125 sample (lower). Reference peaks of diopside (card 98-001-7094 of ICSD database) are shown in blzue color, reference peaks of magnesian hedenbergite (card 01-087-0702 of ICSD database) are shown in red color. Concerning diffractogram of HeE0125 sample, letters A and G indicate the amphibole's and the gypsum's peaks, respectively.
