

**Supplemental material for**  
**Static compression of B2 KCl to 230 GPa and its  $P$ - $V$ - $T$  equation**  
**of state by Tateno et al.**

**FIGURE S1.** Unrolled XRD images collected after (a) laser annealing and (b) the following compression at room temperature in run #1. The diffraction line/spot from KCl (110) broadened/disappeared upon compression.
