Contents

Preface vii

Chapter 1 EXTERNAL SYMMETRY 1

Simple Symmetry Elements 1
Kinds of Symmetry Operations 6
The Five Improper Axes 9
Combinations of Symmetry Elements 11
Reference and Recommended Reading 25
Questions and Problems 25
Answers 25

Chapter 2 CRYSTAL CLASSES, AXES, AND SYSTEMS 26

The Thirty-Two Crystal Classes 26
Crystallographic Axes 32
The Triclinic System 33
The Monoclinic System 34
The Orthorhombic System 35
The Tetragonal System 36
The Hexagonal System 38
The Isometric or Cubic System 40
Abbreviated Symbols 41
Symbolism for Axial Units 42
Relation of Crystal Classes to Crystal Systems 43
Schoenflies' Notation (Optional) 44
Questions and Problems 47
Answers 47

Chapter 3 CRYSTAL NOMENCLATURE AND CALCULATIONS 48

Nomenclature for Crystal Faces 48
Axial Elements 54
Nomenclature for Linear Directions 56
Crystallographic Calculations 58
Appendix 65
References and Recommended Reading 67
Questions and Problems 68
Answers 69

Chapter 4 CRYSTAL PROJECTIONS 70

Direct and Reciprocal Projections 70
The Cyclographic and Stereographic Projections 71
The Stereonet 77
Crystal Projection 81
Further Operations with the Stereonet 92
The Gnomonic Projection 96
Reference and Recommended Reading 97
Questions and Problems 97
Answers 98

Chapter 5 CRYSTAL FORMS AND CLASS DETERMINATION 99

Crystal Forms 99
Triclinic Forms 103
Monoclinic Forms 105
Orthorhombic Forms 109
Tetragonal Forms 113
Hexagonal Forms (Trigonal Subsystem) 117
Hexagonal Forms (Hexagonal Subsystem) 123
Isometric Forms 126
Enantiomorphous Forms and Crystals 133
Class Determination 135
Form Symbols for Directions 138
Questions and Problems 138
Answers 139

Chapter 6 TRANSLATIONAL SYMMETRY: LATTICES 140

Arrays and Identipoints 140
Types of Line Lattices and Nets 143
Lattice-Imposed Restrictions on Symmetry Axes 145
The Fourteen Types of Space Lattices 147
Choice and Orientation of Unit Cell 154
Summary 156
References and Recommended Reading 158
Questions and Problems 158
Answers 159

Chapter 7 INTERNAL SYMMETRY: SPACE GROUPS 160

Simple Space Groups 162
Rotational-Translational Symmetry 165
The 230 Space Groups 170
References and Recommended Reading 181
Questions and Problems 181
Answers 182

Chapter 8 CRYSTAL CHEMISTRY 183

Atoms and Their Structures 183
Chemical Bonds 196
Atomic and Ionic Radii 201
Polarization 218
References and Recommended Reading 219
Questions and Problems 220
Answers 220

Chapter 9 PRINCIPLES OF CRYSTAL STRUCTURES 221

Molecular Crystals 221
Metallic Crystals 222
Polymorphism 228
Covalent Structural Types 228
Ionic Crystals and Packing 230
AX Structures 239
AX_2 Structures 245
A_2X Structures 250
A_2X_3 Structures 251
$A_mB_nX_z$ Structures 252
Derivative Structures 256
Silicate Structures 258
Classification of Silicates 266
Summary and Discussion 277
References and Recommended Reading 281
Questions and Problems 281
Answers 282

Chapter 10 STRUCTURAL VARIATIONS, COMPOSITION, AND STABILITY 284

Structural Imperfections 284
Compositional Variations 291
Chemical Analyses 296
Phase Transformations 299
Types of Polymorphic Transformations 318
Crystal Intergrowths 324

Crystal Morphology 338
References and Recommended Reading 341
Questions and Problems 342
Answers 342

Chapter 11 PHYSICAL PROPERTIES 343

Nondirectional Properties 343
Sensate Properties 352
Directional Properties 352
Cohesive Properties 354
Tensors and Tensor Properties 361
Magnetic Properties 384
Electric Behavior of Dielectric Crystals 400
Physical Properties, Bonding, and Structure 410
Appendix: Matrix Algebra 411
References and Recommended Reading 414
Questions and Problems 415
Answers 416

Chapter 12 CRYSTALS AND LIGHT 417

Nature of Light 417
Transmission of Light 419
Reflection of Light 434
Structural Controls of Optical Properties 437
Optical Properties of Solid Solutions 448
Light Emission 450
References and Recommended Reading 453

Chapter 13 INTRODUCTORY X-RAY CRYSTALLOGRAPHY 454

The Nature of X-rays 454
The Nature of Diffraction 458
The Powder Method 471
Diffraction by Single Crystals 494
Systematic Absences 501
Appendix 524
References and Recommended Reading 527
Questions and Problems 527
Answers 528

Atomic Weights of the Elements 529

Index 531
