--- Low-Temperature Thermochronology: Techniques, Interpretations, and Applications ---

Chapter 7 "$^{4}\text{He}/^{3}\text{He}$ Thermochronometry: Theory, Practice, and Potential Complications"

Pages 181-203

David L. Shuster and Kenneth A. Farley

Equation (5) on page 189 should read:

$$"EdgeAge" = \frac{R_{\text{initial}}}{R_{\text{bulk}}^{\text{measured}}} \cdot \text{HeAge}_{\text{cor}}$$

$$R_{\text{initial}}$$
$$R_{\text{bulk}}$$
$$\alpha = \text{ref}$$
