

## NOTICE

### Mineralogical Meeting in Tucson, Arizona

You are invited to attend a mineralogical meeting sponsored by the following organizations:

Mineralogical Society of America  
Friends of Mineralogy  
Mineral Museums Advisory Council  
University of Arizona  
Tucson Gem and Mineral Society

The meeting will be held in Tucson, Arizona, Sunday and Monday, February 10 and 11, 1974, in conjunction with the 20th Annual Tucson Mineral and Gem Show, Friday, February 8 to Sunday, February 10.

General sessions on mineralogy will be held, and

abstracts are welcome. Two invited symposia will be given: (1) Mineralogy and Paragenesis of Porphyry Copper Deposits; (2) Impact of Modern Analytical Techniques on Mineralogical Nomenclature. There will be a field trip to some famous porphyry copper deposits in Arizona. The annual meetings of the Friends of Mineralogy and the Mineral Museums Advisory Council will be held.

Further information can be obtained from the local chairman, Professor John W. Anthony, to whom abstracts for the general sessions may be sent. Abstracts should not exceed 300 words.

Professor John W. Anthony  
Department of Geology  
University of Arizona  
Tucson, Arizona 85721

## ERRATA

*The American Mineralogist*, Vol. 58, Nos. 1-2, page 116. Adolf Pabst and William N. Sharp. "Kogarkoite, A new natural phase in the system  $\text{Na}_2\text{SO}_4$ - $\text{NaF}$ - $\text{NaCl}$ ."

In the fourth from the last line of the abstract, for 1.422 read 1.442 and for  $[\bar{1}02]$  read  $[102]$ . Both errors are due solely to the failings of Pabst.

They are limited to the abstract and do not appear elsewhere in the paper.

### Reference

PABST, ADOLF, AND WILLIAM N. SHARP (1973) Kogarkoite, a new natural phase in the system  $\text{Na}_2\text{SO}_4$ - $\text{NaF}$ - $\text{NaCl}$ . *Amer. Mineral.* 58, 116-127.
