

AM-95-580

Memorial of Roger G. Burns, 1937-1994

F. A. Frey, T. L. Grove

For deposit: Bibliography of Roger G. Burns

American Mineralogist, 80, 9-10, 1082-1084.

Published Papers (Roger G. Burns)

1. "An interpretation of the kinetics of bimolecular substitution by anionic bases in alcohol-water mixtures" (with B.D. England), *Tetrahedron Letters*, 24, 1-6 (1960).
2. "Crystal-field theory and applications to problems in geochemistry" (with R.H. Clark and W.S. Fyfe), In: *Chemistry of the Earth's Crust*, A.P. Vinogradov, ed., Proc. Vernadsky Centen. Symp., 2, 88-108 (Transl.: Israel Progr. Sci. Transl., Jerusalem, v. 2, pp. 93-112, 1967).
3. "Site preference energy and selective uptake of transition metal ions during magmatic crystallization" (with W.S. Fyfe), *Science*, 144, 1001-1003 (1964).
4. "Formation of cobalt(III) in the amorphous $\text{FeOOH}_{\text{nH}_2\text{O}}$ phase of manganese nodules", *Nature*, 205, 999 (1965).
5. "Factors influencing distribution coefficients in mineral-forming processes" (with W.S. Fyfe), Jubilee Collection in Honor of Academician A.P. Vinogradov, 115-122 (1965).
6. "Apparatus for measuring polarized absorption spectra of small crystals", *Journal of Scientific Instruments*, 43, 58-60 (1966).
7. "Distribution of elements in geological processes" (with W.S. Fyfe), *Chemical Geology*, 1, 49-56 (1966).
8. "Origin of optical pleochroism in orthopyroxenes", *Mineralogical Magazine*, 35, 715-719 (1966).
9. "Electron-probe determination of inter-element relationships in manganese nodules" (with D.W. Fuerstenau), *American Mineralogist*, 51, 893-902 (1966).
10. "Behavior of nickel during magmatic crystallization" (with W.S. Fyfe), *Nature*, 210, 1147-1148 (1966).
11. "Vibronic polarization in the electronic spectra of gillespsites, a mineral containing iron(II) in square planar coordination" (with M.G. Clark and A.J. Stone), *Inorganic Chemistry*, 5, 1268-1272 (1966).
12. "Infrared study of the hydroxyl bands in clinoamphiboles" (with R.G.J. Strens), *Science*, 153, 890-892 (1966).
13. "The influence of solvent composition on the rates of second-order nucleophilic substitution reactions in alcohol-water mixtures" (with B.D. England), *Journal of the Chemical Society (London)*, B, 864-867 (1966).
14. "Cation distribution in anthophyllite from Mössbauer and infrared spectroscopy" (with G.M. Bancroft, A.G. Maddock, and R.G.J. Strens), *Nature*, 212, 913-915 (1966).
15. "Determination of the cation distribution in the orthopyroxene series by the Mössbauer effect" (with G.M. Bancroft and R.A. Movie), *Nature*, 213, 1221-1223 (1967).
16. "Oxidation state of iron in neptunite from Mössbauer spectroscopy" (with G.M. Bancroft and A.G. Maddock), *Acta Crystallographica*, 22, 934-935 (1967).
17. "Structural interpretation of the polarized absorption spectra of Al-Fe-Mn-Cr epidotes" (with R.G.J. Strens), *Mineralogical Magazine*, 36, 204-226 (1967).
18. "Electronic spectra of Cu^{2+} and Fe^{2+} square planar coordinated by oxygen in BaSi_4O_10 " (with M.G. Clark), *Journal of the Chemical Society (London)*, A, 1034-1038 (1967).
19. "Determination of cation distribution in the cummingonite-grunerite series by Mössbauer spectra" (with G.M. Bancroft and A.G. Maddock), *American Mineralogist*, 52, 1009-1026 (1967). [Errata: *American Mineralogist*, 53, 506 (1968)].
20. "Trace element distribution rules and their significance: a review" (with W.S. Fyfe), *Chemical Geology*, 2, 89-104 (1967).
21. "Applications of the Mössbauer effect to silicate mineralogy. Part 1. Iron silicates of known crystal structures" (with G.M. Bancroft and A.G. Maddock), *Geochimica et Cosmochimica Acta*, 31, 2219-2246 (1967).
22. "Interpretation of the electronic spectra of pyroxenes" (with G.M. Bancroft), *American Mineralogist*, 52, 1278-1287 (1967).
23. "Crystal field theory and geochemistry of transition elements" (with W.S. Fyfe), In: *Researches in Geochemistry*, vol. 2, P.H. Abelson, ed., pp. 239-285, J. Wiley & Sons (1967).
24. "Distribution of iron cations in a volcanic pigeonite by Mössbauer spectroscopy" (with G.M. Bancroft), *Earth and Planetary Science Letters*, 3, 125-127 (1967).
25. "Applications of the Mössbauer effect to mineralogy" (with G.M. Bancroft), *Mineralogical Magazine*, 1966 I.M.A. Vol., 36-42 (1968).
26. "Crystal field phenomena and iron enrichments in pyroxenes and amphiboles", *Mineralogical Magazine*, 1966 I.M.A. Vol., 170-183 (1968).
27. "Enrichments of transition metal ions in silicate crystal structures", In: *Origin and Distribution of the Elements*, L.M. Ahrens, ed., pp. 1151-1164, Pergamon Press (1968).
28. "Applications of the Mössbauer effect to silicate mineralogy. Part 2. Iron silicates of unknown and complex crystal structures" (with G.M. Bancroft and A.J. Stone), *Geochimica et Cosmochimica Acta*, 32, 547-559 (1968).
29. "Distribution of iron cations in the crocidolite structure" (with F.J. Prentice), *American Mineralogist*, 53, 770-776 (1968).
30. "Optical absorption in silicates", In: *The Application of Modern Physics to the Earth and Planetary Interiors*, pp. 191-211, Wiley-(Interscience) (1969).
31. "Mössbauer and absorption spectral study of amphiboles" (with G.M. Bancroft), *Mineralogical Society of America, Special Paper No. 2*, 137-148 (1969).
32. "Site preferences of transition metal ions in silicate crystal structures", *Chemical Geology*, 5, 275-283 (1969).
33. "Hydroxyl stretching frequencies in the infrared spectra of anthophyllites and gedrites" (with A.D. Law), *Nature*, 226, 73-75 (1970).
34. "Crystal field spectra and evidence of cation ordering in olivine minerals", *American Mineralogist*, 55, 1608-1632 (1970).
35. "Interpretation of the reflectivity behavior of ore minerals" (with D.J. Vaughan), *American Mineralogist*, 55, 1576-1586 (1970).
36. "Resolution of actinolite Mössbauer spectra into three ferrous doublets" (with C. Greaves and G.M. Bancroft), *Nature*, 233, 60-61 (1971).
37. "Geochemistry and bonding of thiospinel minerals" (with D.J. Vaughan and V.M. Burns), *Geochimica et Cosmochimica Acta*, 35, 365-381 (1971).
38. "Mössbauer spectra of minerals along the diopside-hedenbergite tie line" (with G.M. Bancroft and P.G.L. Williams), *American Mineralogist*, 56, 1617-1625 (1971).
39. "Correlations of infrared and Mössbauer site population measurements of actinolites" (with C. Greaves), *American Mineralogist*, 56, 2010-2013 (1971).
40. "Cation determinative curves for Mg-Fe-Mn olivines from vibrational spectra" (with F.E. Huggins), *American Mineralogist*, 57, 967-985 (1972).
41. "Applications of high pressure Mössbauer spectroscopy to Mantle mineralogy" (with F.E. Huggins and H.C. Drickamer), *Proceedings of the 24th International Geological Congress, Section 14*, 113-123 (1972).
42. "Mössbauer spectroscopy and bonding in sulfide minerals containing four-coordinated iron" (with D.J. Vaughan), *Proceedings of the 24th International Geological Congress, Section 14*, 153-167 (1972).
43. "Polarized absorption spectra of single crystals of lunar pyroxenes and olivines" (with F.E. Huggins and R.M. Abu-Eid), *The Moon*, 4, 93-102 (1972).
44. "Mixed valencies and site occupancies of iron in silicates by Mössbauer spectroscopy", *Canadian Journal of Spectroscopy*, 17, 51-59 (1972).
45. "Crystal field spectra of lunar pyroxenes" (with R.M. Abu-Eid and F.E. Huggins), *Proceedings of the Third Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 3*, vol. 1, pp. 533-543 (1972) MIT Press.
46. "Site preferences of Ni^{2+} and Co^{2+} in clinopyroxene and olivine: Limitations of the statistical approach", *Chemical Geology*, 2, 67-73 (1972).
47. "Pressure-induced reduction of a ferric amphibole: Implications to Mantle mineralogy" (with D.J. Vaughan and J.A. Tossell), *Nature*, 240, 33-35 (1972).
48. "Nucleation and mineralogical controls on the composition of manganese nodules" (with S.A. Brown), In: *Ferromanganese Deposits on the Ocean Floor*, D.R. Horn, ed., *Publications of the Office for the International Decade of Ocean Exploration, National Science Foundation*, pp. 51-61 (1972).
49. "Low oxidation states of Fe and Ti in the Apollo 17 orange soil" (with D.J. Vaughan), *EOS (Transactions of the American Geophysical Union)*, 54, 618-620 (1973).
50. "Visible-region absorption spectra of Ti^{3+} fassaite from the Allende meteorite: a discussion" (with F.E. Huggins), *American Mineralogist*, 58, 955-961 (1973).
51. "The partitioning of trace elements in mineral structures: a provocative review with applications to mantle geochemistry", *Geochimica et Cosmochimica Acta*, 37, 2395-2403 (1973).
52. "Crystal Chemistry of Cobalt" (with V.M. Burns), In: *Handbook of Geochemistry*, K.M. Wedepohl, ed., vol. II-3, Ch. 27-A (Springer-Verlag) (1974).
53. "Crystal Chemistry of Nickel" (with V.M. Burns), In: *Handbook of Geochemistry*, K.M. Wedepohl, ed., vol. II-3, Ch. 28-A (Springer-Verlag) (1974).
54. "Spectral evidence for Cr^{2+} , Ti^{3+} , and Fe^{2+} rather than Cr^{3+} and Fe^{3+} in lunar ferromagnesian silicates" (with D.J. Vaughan, R.M. Abu-Eid, M. Witmer, and A. Morawski), *Proceedings of the Fourth Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 4*, vol. 1, 933-934 (1973) Pergamon.
55. "Magnetic and Mössbauer studies of Apollo 16 rock chips 60315, 51 and 62295, 27" (with A. Brecher, D.J. Vaughan, and K.R. Morash), *Proceedings of the Fourth Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 4*, vol. 3, 2991-3001 (1973) Pergamon.
56. "Crystal Chemistry of Magnesium" (with V.M. Burns), In: *Handbook of Geochemistry*, K.M. Wedepohl, ed., vol. II-3, Ch. 12-A (Springer-Verlag) (1974).
57. "Polarized absorption spectra of gillespsites at high pressure" (with R.M. Abu-Eid and M.K. Mao), *Annual Report of the Geophysical Laboratory, Year Book 72*, 564-567 (1973).

58. "The polarized spectra of iron in silicates: Olivine. A discussion of neglected contributions from Fe^{2+} ions in M(1) sites", American Mineralogist, 59, 625-629 (1974).
59. " $\text{Ti}^{3+}/\text{Ti}^{4+}$ ratios in lunar pyroxenes: implications to depths of origin of mare basalt magma" (with C. M. Sung and R. M. Abu-Eid), Proceedings of the Fifth Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 5, vol. 1, pp. 717-726 (1974).
60. "Charge transfer in lunar materials: interpretation of ultraviolet-visible spectral properties of the moon" (with B. M. Loeffler, J. A. Tossell, D. J. Vaughan, and K. H. Johnson), Proceedings of the Fifth Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 5, vol. 3, pp. 3007-3016 (1974).
61. "Manganese ore deposits and plate tectonics" (with M. Thonis), Nature, 253, 614-615 (1975).
62. "Mechanism for nucleation and growth of manganese nodules" (with V. M. Burns), Nature, 255, 130-131 (1975).
63. "Crystal field effects in chromium and its partitioning in the mantle", In: Chromium: Its Physiochemical Behavior and Petrologic Significance, T. N. Irvine, ed., Geochimica et Cosmochimica Acta, 39, 857-864 (1975).
64. "Mineralogy of chromium" (with V. M. Burns), In: Chromium: Its Physiochemical Behavior and Petrologic Significance, T. N. Irvine, ed., Geochimica et Cosmochimica Acta, 39, 903-910 (1975).
65. "Polarized Electronic Spectra" (with D. J. Vaughan), In: Infrared and Raman Spectroscopy of Lunar and Terrestrial Minerals, C. Karr, Jr., ed., Chapter 2, pp. 39-72 (1975) Academic Press.
66. "On the occurrence and stability of divalent chromium in olivines included in diamonds", Contributions to Mineralogy and Petrology, 51, 213-221 (1975).
67. "Metal-metal charge transfer in lunar materials: interpretation of visible-region spectra of Ti-rich areas of the moon" (with B. M. Loeffler and J. A. Tossell), Proceedings of the Sixth Lunar Science Conference, Geochimica et Cosmochimica Acta, Supplement 6, vol. 3, 2663-2676 (1975).
68. "Structural relationships between the manganese (IV) oxides" (with V. M. Burns), Chapter 16 in: Proc. Intern. Symp. on Manganese Dioxide (ed. A. Kozawa and R. J. Brodd; publ. by Electrochem. Soc.), pp. 306-327 (1975).
69. "Classification of natural manganese dioxide minerals" (with V. M. Burns and W. K. Zwicker), Chapter 15 in: Proc. Intern. Symp. on Manganese Dioxide (ed. A. Kozawa and R. J. Brodd; publ. Electrochem. Soc.), pp. 288-305 (1975).

70. "The uptake of cobalt into ferromanganese nodules, soils, and synthetic manganese (IV) oxides", *Geochimica et Cosmochimica Acta*, 40, 95-102 (1976).
71. "Kinetics of high pressure phase transformations: implications to the evolution of the olivine-spinel transition in the downgoing lithosphere and its consequences on the dynamics of the mantle" (with C-M. Sung), *Tectonophysics*, 31, 1-32 (1976).
72. "Pacific deep-sea manganese nodules: their distribution, composition, and origin" (with S. V. Margolis), *Ann. Rev. Earth Planet. Sci.*, vol. 4, 229-263 (1976).
73. "The effect of pressure on the degree of covalency of the cation-oxygen bond in minerals" (with R. M. Abu-Eid), *American Mineralogist*, 61, 391-397 (1976).
74. "Partitioning of transition metals in mineral structures of the mantle", in: The Physics and Chemistry of Minerals and Rocks, (R. G. J. Strens, ed.; John Wiley and Sons, publ.), pp. 555-572 (1976).
75. "Kinetics of the olivine-spinel transition: implications to deep focus earthquake genesis" (with C-M. Sung), *Earth Planet. Sci. Lett.*, 32, 165-170 (1976).
76. "Shedding Light on the color of gems and minerals" (with B. M. Loeffler), *American Scientist*, 64, 636-647 (1976).
77. "Further characterization of spectral features attributable to titanium on the moon" (with K. M. Parkin, B. M. Loeffler, R. M. Abu-Eid, and I. S. Leung), *Proc. 7th Lunar Science Conference, Suppl. 7*, *Geochim. Cosmochim. Acta*, 3, 2561-2578 (1976).
78. "Metallogenesis of transition elements at convergent plate margins in the southwest Pacific", in: *United Nations Committee for Coordination of Joint Prospecting for Mineral Resources in South Pacific Offshore Areas (CCOP/SOPAC)*, *Tech. Bull.*, 2, (G. P. Glasby and H. R. Katz, ed.; United Nations Publ.), p. 14-20 (1976).
79. "Electronic absorption spectra of lunar minerals" (with D. J. Vaughan), *Phil. Trans. Royal Society (London) A*, 285, 249-258 (1977).
80. "Mineralogy of Manganese Nodules" (with V. M. Burns), Chapter 7 in: Marine Mineral Deposits (G. P. Glasby, ed.; Elsevier Publ. Co.), pp. 185-248 (1977).
81. "The mineralogy and crystal chemistry of deep-sea manganese nodules, a polymetallic resource of the twenty-first century" (with V. M. Burns), *Phil. Trans. Royal Soc., (London)*, A286, 283-301 (1977) [Centenary Volume, *Mineral. Soc.*, p. 49-67, 1977].
82. "Transition element metallogenesis and plate tectonics," in: Geochemistry 1975, A. J. Ellis, ed., *New Zealand D.S.I.R. Bulletin*, 218, 76-82 (1977).

- 1980-present: Member, Steering Committee, Mining and Mineral Resources Research Institute at Massachusetts Institute of Technology
- 1980: Panelist, Deutsche Forschungsgemeinschaft Colloquium, High Pressure Geoscience, Bonn, W. Germany, October 1980.
- 1981: Member, NASA Planetary Instrument Definition Program, proposal review panel.
Listed in American Men of Science (e.g. 15th ed., p. 804) and Who's Who in America (e.g. 42nd ed., p. 461)
- 1983: Member, Site-vist proposal review panel of the National Science and Engineering Research Council of Canada

List of Publications (since 1977)

83. "Crystal structural features of the olivine-spinel transition," (with C-M. Sung), Physics and Chemistry of Minerals, 2, 177-197 (1978).
84. "Mossbauer spectra of kyanite, aquamarine, and cordierite showing intervalence charge transfer," (with K.M. Parkin and B.M. Loeffler), Physics and Chemistry of Minerals, 1, 301-377 (1977).
85. "Temperature dependence of Fe^{2+} crystal field spectra: implications to mineralogical mapping of planetary surfaces," (with C-M. Sung, R.B. Singer, K.M. Parkin, and M. Osborne) Proc. 8th Lunar Science Conference, Suppl. 8, Geochimica et Cosmochimica Acta, p. 1063-1079 (1977).
86. "Post-depositional metal enrichment processes inside manganese nodules from the north equatorial Pacific," (with V.M. Burns), Earth and Planetary Science Letters, 39, 341-348 (1978).
87. "The effect of crystal field splittings on the olivine-spinel transition in the system Mg_2SiO_4 - Fe_2SiO_4 " (with C-M. Sung), Physics and Chemistry of Minerals, 2, 349-364 (1978).
88. "Diagenetic features observed inside deep-sea manganese nodules from the north equatorial Pacific," (with V.M. Burns), Scanning Electron Microscopy-1978, vol. 1, p. 245-252 (1978).
89. "Temperature-dependence of Fe-Ti spectra in the visible region: implications to mapping Ti concentrations of hot planetary surfaces (with M. Osborne and K.M. Parkin), Proc. 9th Lunar Science Conference, Suppl. 10, Geochimica et Cosmochimica Acta, p. 2949-2960 (1978).
90. "Authigenic todorokite and phillipsite inside deep-sea manganese nodules," (with V.M. Burns), American Mineralogist, 63, 827-831 (1978).
91. "Deployment of long-term seafloor mineral exposure experiments to measure changes of mineralogy and composition of manganese nodules (with V.M. Burns, H.W. Stockman, C.T. Stockman and M.D. Bensen), Mineral Technology Society, Oceans 78, 622-667 (1978).
92. "Temperature dependent Fe^{2+} - Fe^{3+} charge transfer in ilvaite," (with D. Nolet) Geophysics Research Letters, 5, 821-824 (1978).

93. "Observations of processes leading to the uptake of transition metals in manganese nodules," (with V.M. Burns), In: Proceedings of the International Colloquium on the Genesis of Manganese Nodules (C. Lalou, ed.; Publ. by Centre National de la Recherche Scientifique) 289, 387-404 (1979).
94. "Ilvaite: a study of temperature dependent electron delocalization by the Mossbauer effect," (with D.A. Nolet) Physics and Chemistry of Minerals, Physics and Chemistry of Mineral., 4, 221-234 (1979).
95. "Spectra of Fe-Ti silicate glasses: implications to remote-sensing of planetary surfaces," (with D.A. Nolet, S.L. Flamm, and J.R. Besancon) Proc. 10th Lunar Planet. Sci. Conf., Suppl. 11, Geochimica et Cosmochimica Acta, p. 1775-1786 (1979).
96. "Manganese oxides" (with V.M. Burns) Chapter 1 in: Marine Minerals (R.G. Burns, ed.; Mineralogical Society of America Publication) Reviews in Mineralogy, 6, 1-46 (1979).
97. "Mossbauer spectroscopy and crystal chemistry of natural Fe-Ti garnets" (with K.B. Schwartz and D.A. Nolet) American Mineralogist, 65, 142-153 (1980).
98. "The oxidation mechanism of vivianite as studied by Mossbauer spectroscopy" (with C.A. McCammon) American Mineralogist, 65, 361-366 (1980).
99. "Does feroxyhyte occur on the surface of Mars?" Nature, 285, 647 (1980) and 288, 196 (1980).
100. "Mixed valence minerals of iron and titanium: correlations of structural, Mossbauer, and electronic spectral data" In: Mixed Valence Compounds: Theory and Applications in Chemistry, Physics, Geology, and Biology (Proceedings of the NATO Advanced Study Institute, Oxford, England, Sept. 1979; D.B. Brown, ed.; D. Reidel Publ. Co., Dordrecht, Holland), 295-336 (1980).
101. "High temperature crystal field spectra of transition metal-bearing minerals: relevance to remote-sensed spectra of planetary surfaces" (with K.M. Parkin) Proc. 11th Lunar Planet. Sci. Conf., Suppl. 12, Geochimica et Cosmochimica Acta, 731-755 (1980).
102. "Intervalence transitions in mixed-valence minerals of iron and titanium" Annual Reviews of Earth and Planetary Sciences, 9, 345-383, (1981).
103. "Structures and reactivities of manganese (IV) oxides" (with V.M. Burns) Manganese Dioxide Symposium, vol. 2, Tokyo (B. Schumm, H. M. Joseph, and A. Kozawa, eds.; Electrochemical Society Publication), p. 97-112 (1980).
104. "Potentially productive research areas of MnO₂ from the structural consideration and recent patents" (with K. Matsuki and A. Kozawa) Manganese Dioxide Symposium, Vol. 2, Tokyo (B. Schumm, H. M. Joseph, and A. Kozawa, eds.; Electrochemical Society Publication), p. 682-700 (1980).

105. "Fluxes of metals to a manganese nodule: radiochemical, chemical, structural, and mineralogical studies" (with W.S. Moore, T.L. Ku, J.D. MacDougall, V.M. Burns, J. Dymond, M.W. Lyle, D.Z. Piper) *Earth and Planetary Science Letters*, 52, 151-171 (1981).
106. "Authigenic oxides" Chapt. 22 in: *The Sea*, vol. 7 "The Oceanic Lithosphere" (C. Emiliani, ed.; J. Wiley Publ.), 875-914 (1981).
107. "Coordination chemistry of iron in glasses contributing to remote-sensed spectra of the Moon" (with M. D. Dyar) *Proceedings of the 12th Lunar and Planetary Sciences Conference*, p. 695-702 (1981).
108. "Electronic spectra of minerals at high pressures: how the mantle excites electrons" In: *High Pressure Studies in the Geosciences* (W. Schreyer, ed.; E. Schweizerbart'sche Verlagsbuchhandlung, Stuttgart, W. Germany), p. 223-246 (1982).
109. "Spectral characteristics of the iron oxides with application to the Martian bright region mineralogy" (with D.M. Sherman and V.M. Burns), *Journal of Geophysical Research*, 87 (B12), 10169-10180 (1982).
110. "A review of the todorokite-buserite problem: implications to the mineralogy of marine manganese nodules" (with V.M. Burns and H.W. Stockman), *American Mineralogist*, 68, 972-980 (1983).
111. "Colours of gems", *Chemistry in Britain*, 19(12), 1004-1007 (1983).
112. "Spectral chemistry of green glass-bearing 15426 regolith" (with M.D. Dyar), Proc. 14th Lunar Planet. Sci. Conf., *Journal of Geophysical Research*, 88, supplement, B221-B228 (1983).
113. "Structural linkages of tetravalent manganese oxides", Chapter 33 in: *Battery Materials Symposium* (A. Kozawa and M. Nagayama, eds.; Intern. Battery Material Assoc. Publ.), vol. 1, p. 341-354 (1983).
114. "Crystal chemistry of meteoritic hibonite" (with V.M. Burns), Proc. 15th Lunar Planet. Sci. Conf., *Journal of Geophysical Research*, 89, supplement, C313-C321 (1984).
115. "Optical and Mossbauer spectra of transition metal-doped corundum and periclase" (with V.M. Burns), in: *Structure and Properties of MgO and Al₂O₃ Ceramics* (W.O. Kingery, ed.; Amer. Ceram. Soc. Inc.), *Advances in Ceramics*, 10, 46-61 (1984).
116. "Electronic spectra of minerals; Chapter 3 in: *Chemical Bonding and Spectroscopy in Mineral Chemistry* (F.J. Berry and D.J. Vaughan, eds.; Chapman and Hall, London), p. 63-101 (1985).
117. "The todorokite-buserite problem: further considerations" (with V.M. Burns and H.W. Stockman), *American Mineralogist*, 70, 205-208 (1985).
118. "Tunnelling through MnO₂: covalent bonding and structural linkages in tetravalent manganese oxides", in: *Manganese Dioxide Electrodes Theory and Practice for Electrochemical Applications* (B.J. Schumm, ed., Electrochemical Society), Proc. vol. 85-4, p. 97-111 (1985).
119. "Thermodynamic data from crystal field spectra", Chapter 8 in: *Microscopic to Macroscopic: Atomic Environments to Mineral Thermodynamics* (S.W. Kieffer and A. Navrotsky, eds.; Min. Soc. Amer. Publ.), *Reviews in Mineralogy*, 14, 277-316 (1985).
120. "Mechanism of lithium insertion into electrolytic manganese dioxide", The 2nd Battery Material Symposium, Graz, Austria, vol. 2, p. 181-184 (1985).
121. "Terrestrial analogues of the surface rocks of Mars?", *Nature*, 320, 55-56 (1986).
122. "Crystal chemistry of ferruginous one-layer trioctahedral micas" (with M.D. Dyar), *American Mineralogist*, 71, 955-965 (1986).
123. "Site incompressibilities from high pressure crystal field spectra" in: *High Pressure Research Geophysics and Geochemistry* (M.H. Manghnani and Y. Syono, eds.; Terra Publ., Tokyo), p. 17-25 (1987).
124. "Ferric sulfates on Mars", Proc. 15th Lunar Planet. Sci. Conf., *Journal of Geophysical Research*, 92, supplement, (B4), E570-E574 (1987).
125. "Gossans on Mars", Proc. 18th Lunar Planet. Sci. Conf. (Camb. Univ. Press), p. 713-721 (1988).
126. "Iron Mossbauer spectral study of weathered Antarctic and SNC meteorites" (with T.C. Solberg), Proc. 19th Lunar Planet. Sci. Conf. (Camb. Univ. Press), p. 313-322 (1989).
127. "Mossbauer spectra of ⁵⁷Fe in rare earth perovskites: Applications to the electronic states of iron in the mantle", in: *Perovskite: A structure of Great Interest to Geophysics and Materials Science* (A. Navrotsky and D. Weidener, eds.; AGU Monograph 45), p. 81-90 (1989).
128. "Spectral mineralogy of the terrestrial planets: sampling their surfaces remotely", The 19th Hallimond Lecture, *Mineralogical Magazine*, 53, 135-151 (1989).
129. "Crystal structure trends in Mossbauer spectra of ⁵⁷Fe-bearing oxide, silicate, and aluminosilicate minerals" Chapter 14 in: *Structures of Active Sites in Minerals* (J. M. Coyne, S. W. S. McKeever, and D. F. Drake, eds; American Chemical Society Publ.) ACS Symposium Series, no. 415, 262-283 (1989)

Selected Publications (since 1990)

130. "Activity diagrams for clinoptilolite: susceptibility of this zeolite to further diagenetic reactions," (with T. S. Bowers) *American Mineralogist*, 75, 601-619 (1990).
131. "Evolution of sulfide mineralization on Mars" (with D. S. Fisher). *Journal of Geophysical Research*, (MEVTW Workshop Special Issue), 95, 14169-14173 (1990).
132. "Iron-sulfur mineralogy of Mars: magmatic evolution and chemical weathering products" (with D. S. Fisher) *Journal of Geophysical Research*, (4th Intern. Conference on Mars Special Issue), 95, 14415-14421 (1990).
133. "Reactivity of zeolites forming in vitric tuiffs in the unsaturated zone at Yucca Mountain, Nevada" (with T. S. Bowers, V. J. Wood, J. D. Blundy, and M. E. Morgenstein), in: Nuclear Waste Isolation in the Unsaturated Zone, (American Nuclear Society Publ.), p. 101-112 (1990).
134. "Structural controls on visible-region and Mossbauer spectra of mixed-valency minerals", Ch. in: Mixed Valency Systems: Applications in Chemistry, Physics and Biology", *NATO ASI-C Series, Mathematical and Physical Sciences*, C343, 175-200 (1991).
135. "Mossbauer spectra of olivine-rich achondrites: Evidence for preterrestrial redox reactions" (with S. L. Martinez), *Proc. 21st Lunar Planet. Sci. Conf.*, p. 331-340 (1991).
136. "Crystal chemistry and Mossbauer spectra of babingtonite, the state mineral of Massachusetts" (with M. D. Dyar) *American Mineralogist*, 76, 892-899 (1991). [Special Issue Honoring J. B. Thompson].
137. "Spectral chemistry of oxidized pyroxenes: implications to remote-sensing of terrestrial planets" (with D. W Straub and S. F. Pratt), *Journal of Geophysical Research*, 96, (E3), 18,819-18,830 (1991).
138. "Origin of electronic spectra of minerals in the visible-near infrared region." Ch. 1 in: Remote Geochemical Analysis: Elemental and Mineralogical Composition. (C. Pieters and P. A. J. Englert, eds) (1992).
139. "Mossbauer spectral characterization of planetary surface materials." Ch. 26 in: Remote Geochemical Analysis: Elemental and Mineralogical Composition. (C. Pieters and P. A. J. Englert, eds) (1992).
140. "Rates of oxidative weathering on the surface of Mars." *Journal of Geophysical Research - Planets*, 98, 3365-3372 (1993).
141. "Mineralogical Applications of Crystal Field Theory", 2nd ed., Cambridge University Press, June (1993). 1970
142. "Consortium report on the ancient H chondrite regolith breccia Noblesville" (with M. E. Lipschutz *et al.*), *Meteoritics*, ~~in press~~, 28, 528-537 (1993)
143. "Rates and mechanisms of chemical weathering of ferromagnesian silicate minerals on Mars". *Geochim. Cosmochim. Acta*, 57, ~~in press~~ (1993). p 4555 - 4574
144. "The MSATT Workshop on Chemical Weathering on Mars." *Geochim. Cosmochim. Acta*, 57, ~~in press~~ (1993). 4551 - 4554
145. "Reflectance and Mossbauer spectroscopy of ferrihydrite-montmorillonite assemblages as Mars soil analog materials." *Geochim. Cosmochim. Acta*, 57, ~~in press~~ (1993). 4583 - 4595
146. "Nanophase mixed-valence iron minerals in meteorites identified by cryogenic Mossbauer spectroscopy." *Proceedings International Conference on Applications of the Mossbauer Effect* (ICAME), *Hyperfine Interact.*, 72 (in press) 1993.
