

Spot_Locations.pdf

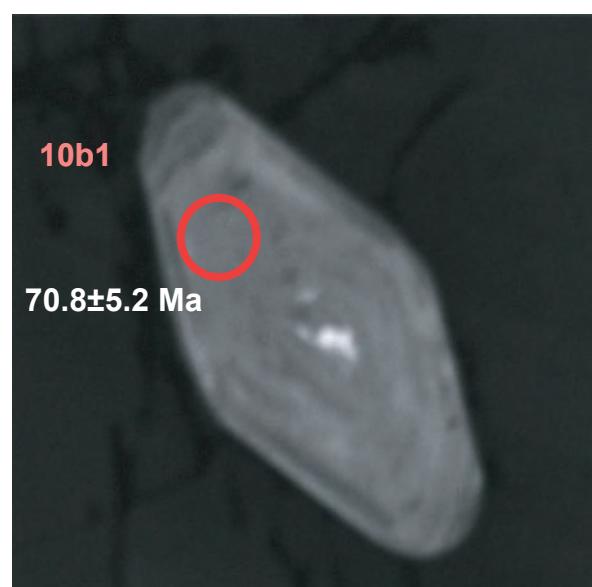

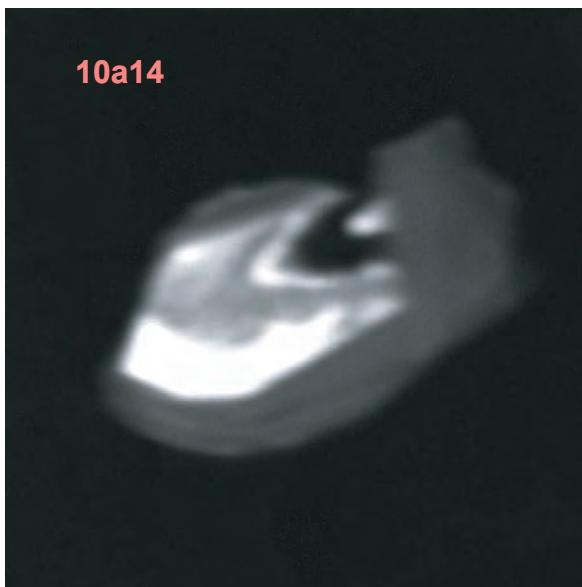

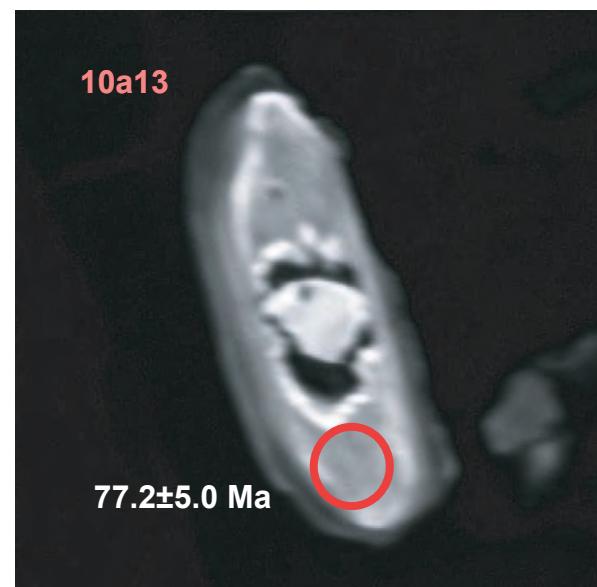

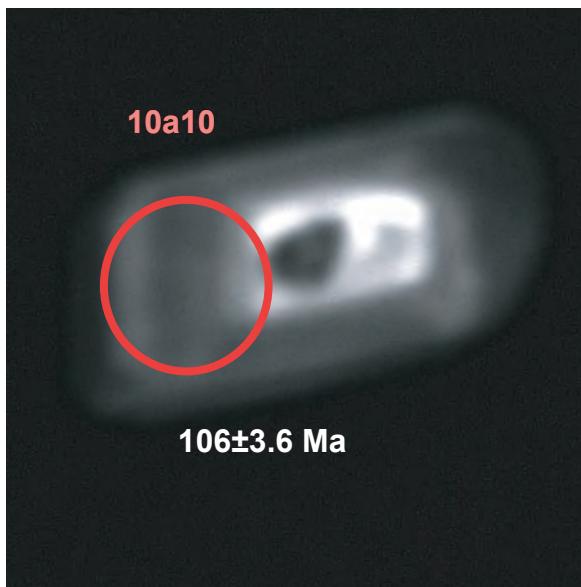

This file contains grain imagery with spot locations for SHRIMP analyses of zircon and monazite and electron probe analyses of monazite. SHRIMP spot locations are shown as red (zircon) or white (monazite) rings centered on the analyzed portion. Small dots on monazite maps/BSE images are locations for focused beam electron probe analyses of monazite. Several X-ray maps were distorted by surface charging effects during prolonged mapping, and hence BSE images are shown instead. Full details of analytical methods appear in the supplementary data file Detailed_Analytical_Methods.doc.

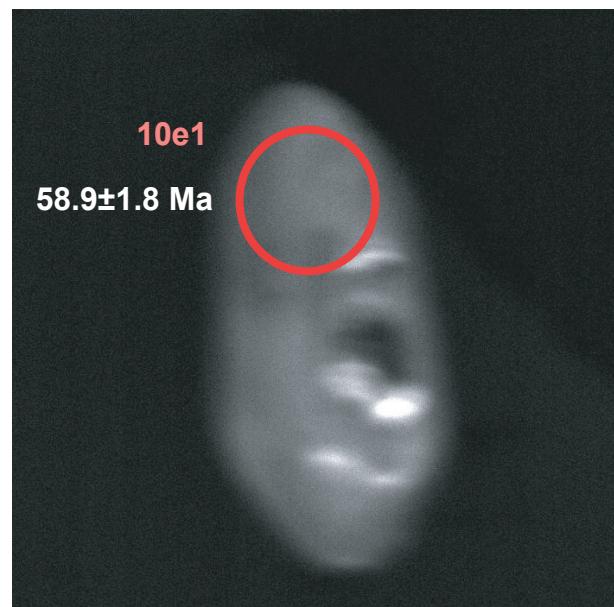

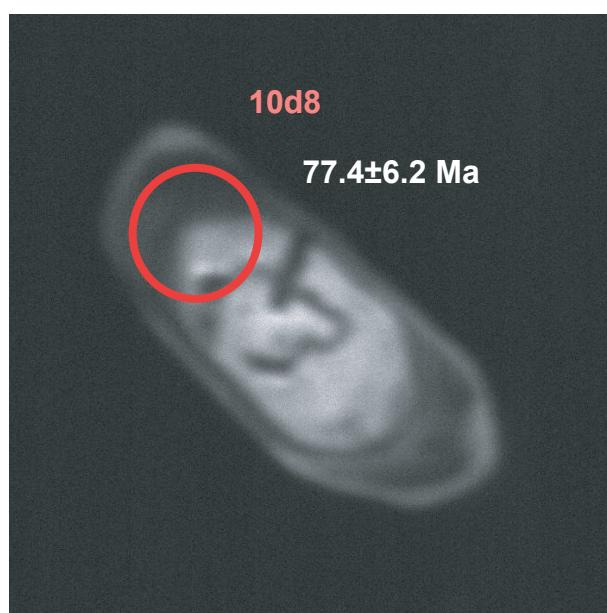

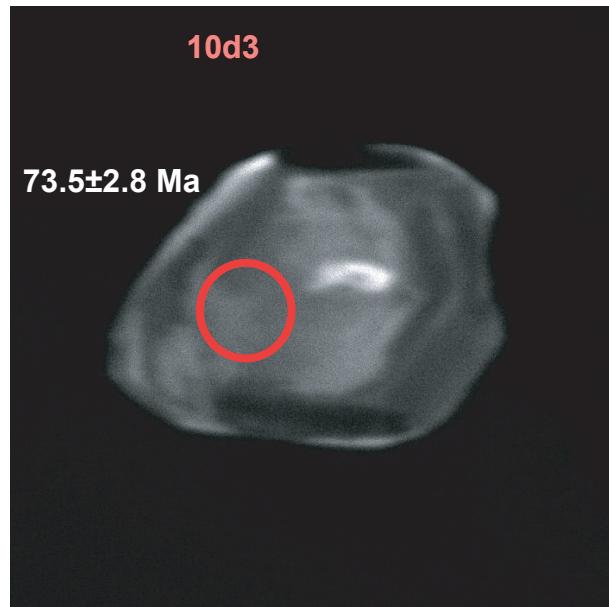

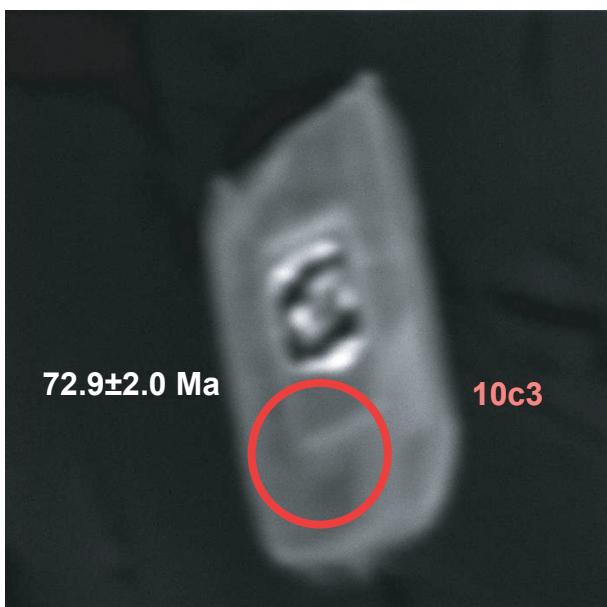

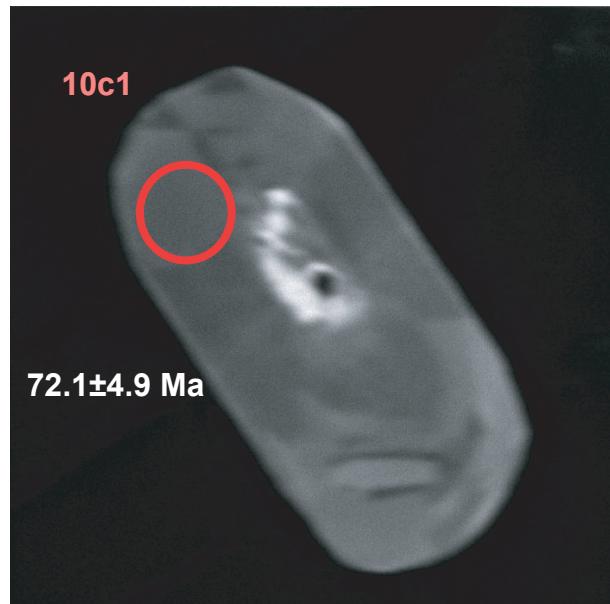

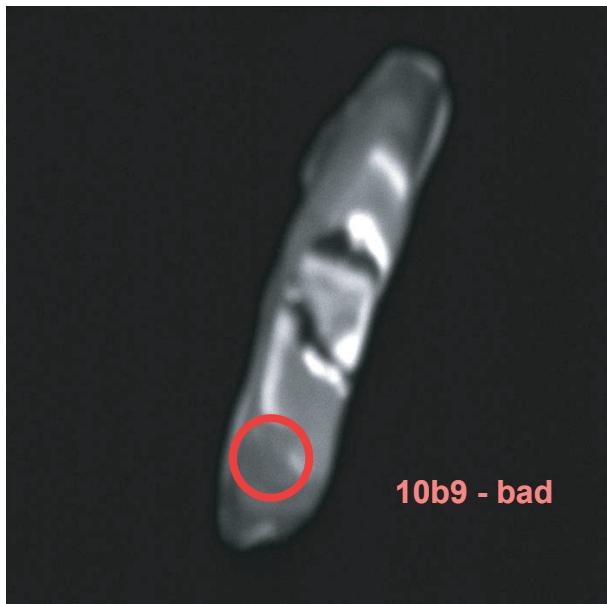

Grains are shown in the following order:

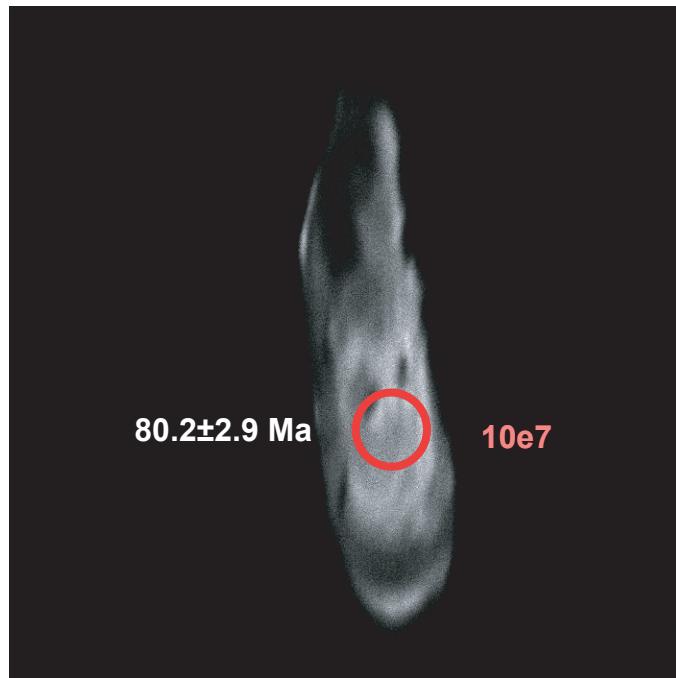

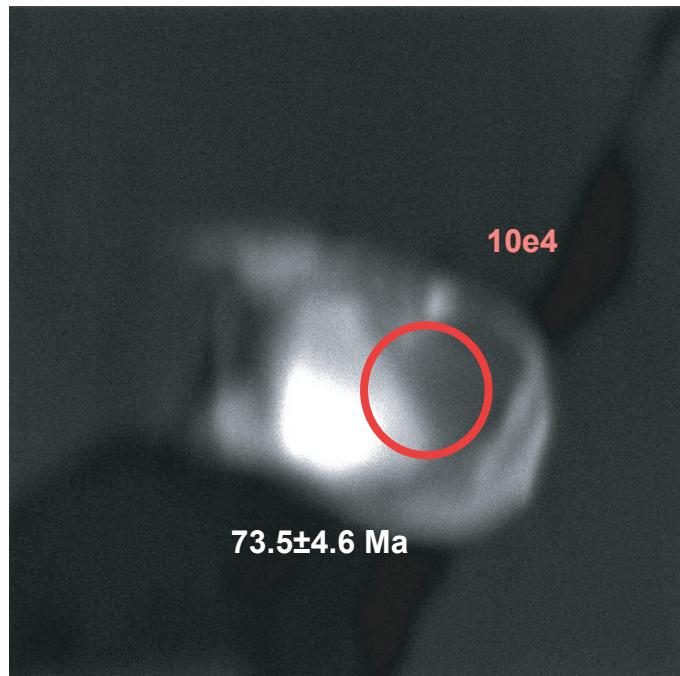

WLN zircon	2
EH09 zircon CL	2
EH09 zircon BSE.....	3
EH10 zircon CL	4
EH09 zircon BSE.....	7
LBB zircon	10
EH49 zircon CL	10
EH09 zircon BSE.....	12
WLN monazite X-ray Maps and BSE	14
EH09 monazite.....	14
EH10 monazite.....	15
EH21 monazite.....	19
LBB monazite X-ray Maps and BSE.....	21
EH30 monazite.....	21
EH31 monazite.....	22
EH45 monazite.....	25
EH49 monazite.....	27
EH48 monazite.....	30
