

ERRATA

Thermodynamic functions at zero pressure and their relation to equations of state of minerals, by Peter I. Dorogokupets (v. 85, no. 2, 329–337, 2000).

Figure 3 and its caption were inadvertently left out of this manuscript. The editors regret this error.

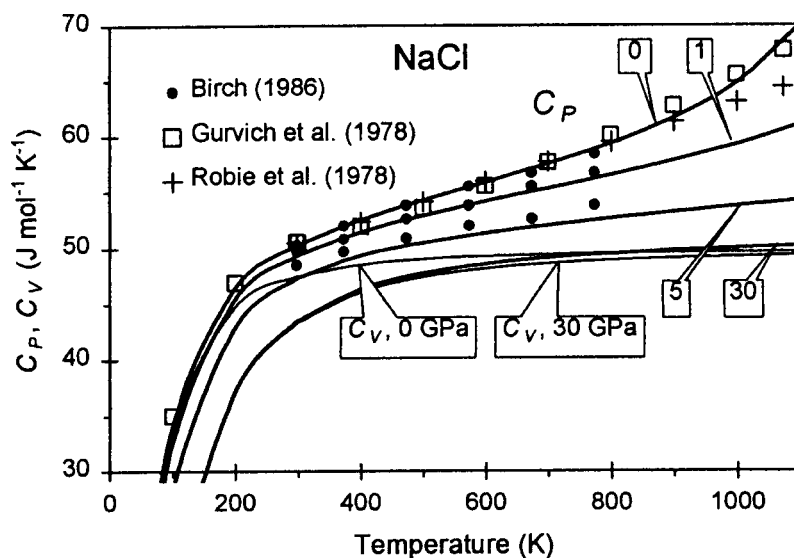

FIGURE 3. Heat capacity at constant pressure and constant volume, C_p and C_v , vs. T for rock salt. The thick, solid lines represent C_p calculated using SW EoS for 0, 1, 5, and 30 GPa isobars; the thin lines represent C_v at 0 and 30 GPa.
