

## Errata

**Multiple pyroxene and amphibole assemblages in the amphibolite facies: Bulk compositional controls**, by Wolf-Achim Kahl and John C. Schumacher (v. 85, nos. 11–12, p. 1606–1616, 2000).

Figure 8 on page 1613 is missing symbols. It is printed correctly below.

**The crystal structure of thornasite, Na<sub>12</sub>Th<sub>3</sub>[Si<sub>8</sub>O<sub>19</sub>]<sub>4</sub>(H<sub>2</sub>O)<sub>18</sub>: A novel interrupted silicate framework**, by Yaping Li, Sergey B. Krivovichev, and Peter C. Burns (v. 85, p. 1521–1525, 2000).

We regret that the stated locality corresponding to the crystals of thornasite used in this study was incorrect. The correct locality for the specimen is DeMix-Varennes Quarry, Saint-Amable sill, Saint-Amable and Varennes, Quebec, Canada. We thank Laszlo Horvath for bringing this to our attention.
