

## CONTENTS

---

<i>Preface</i>	ix
1 Operational and plotting techniques	1
2 Examination of uniaxial crystals	35
3 Examination of biaxial crystals	53
4 Index variation methods and extrapolation	124
5 Index measurements: accuracy, precision, and techniques	153
6 Computer determination of $2V$ and of $X$ , $Y$ , and $Z$ and their dispersion	193
7 Combined optical and X-ray studies of crystals	227
8 Calculating principal birefringences (and $2V$ ) from retardation measurements	262
9 Epilogue and applications	283
<i>Appendixes:</i>	
A Spherical triangles and related formulas	296
B Further discussion of EXCALIBR	303
C Derivation of Joel's equation and an equation for $2V$	312
<i>Answers to questions and problems</i>	316
<i>Notes</i>	324
<i>References</i>	330
<i>Index</i>	336
