

ERRATA

Perbøeite-(Ce) and alnaperbøeite-(Ce), two new members of the epidote-törnebohmite polysomatic series: Chemistry, structure, dehydrogenation, and clue for a sodian epidote end-member by P. Bonazzi, G.O. Lepore, L. Bindi, C. Chopin, T. A. Husdal and O. Medenbach (January, vol. 99, pages 157–169, 2014, Article DOI: <http://dx.doi.org/10.2138/am.2014.4593>; Errata DOI: <http://dx.doi.org/10.2138/am.2014.647>).

The unit-cell parameters listed in the Abstract are to be interpreted in the other way: the first value refers to alnaperbøeite-(Ce) and the second to perbøeite-(Ce).

American Mineralogist: An International Journal of Earth and Planetary Materials

Editors: Keith Putrika and Ian Swainson

We invite you to submit for publication the results of original scientific research in the general fields of mineralogy, crystallography, geochemistry, and petrology. Specific areas of coverage include, but are not restricted to, igneous and metamorphic petrology, experimental mineralogy and petrology, crystal chemistry and crystal-structure determinations, mineral spectroscopy, mineral physics, isotope mineralogy, planetary materials, clay minerals, mineral surfaces, environmental mineralogy, biomineralization, descriptive mineralogy and new mineral descriptions, mineral occurrences and deposits, petrography and petrogenesis, and novel applications of mineralogical apparatus and technique. See our many new special collections and new paper types; explore our GSW site! (Impact Factor 2012: 2.2)

Submit your paper: <http://minsocam.allentrack.net>
Read Am Min via GSW: <http://ammin.geoscienceworld.org/>

Quick Facts

- Average submission-to-publication time ~9 months (~3 months st.dev.).
- MSA member authors qualify for free online color! Regular color costs and page charges are lower than industry standard.
- Over 350,000 hits a year on our Abstracts
- GSW, of which Am Min is a key member, delivers integrated access to 40 online journals (110,000+ articles) from 26 pre-eminent publishers.
- GSW is enhanced with specialized tools developed in partnership with Google Maps™ and AGI's GeoRef.
- Publish with us for high-quality, fast publication, and availability and visibility worldwide
- Open access options (both Gold and Green), preprints, reprints, and e-links are all available — we have the full array of the latest publishing options!
- GSW serves millions of users each year worldwide, and is now optimized for mobile devices.
- Am Min is in the top 10% of all journals in the Earth and Planetary Sciences for total citations.
