The following individuals reach 50 or 25 years of continuous membership in the Society during 2002. Their long support of the Society is appreciated and is recognized by this list and by 25- or 50-year pins mailed in early January. If you should be on this list and are not, or have not received your pin, please contact the Business Office.

50-year Members

Dr. Arden L. Albee

Members nominate outstanding students in mineralogy for society's undergraduate award

MSA members have taken advantage of the Society's American Mineralogist Undergraduate (AMU) Award program to recognize outstanding students who have shown an interest and ability in the discipline of mineralogy. Each student was cited by his or her department for outstanding achievement in mineralogy-related courses. The AMU Awards allow MSA to join with the individual faculty to formally recognize outstanding students. Each student is presented a certificate at an awards ceremony at his or her university or college. In addition, each recipient re-

2002 candidates for MSA offices

The following is the slate of officer candidates for the Council year 2003:

President:

Douglas Rumble III, Carnegie Institution

Vice Presidential nominees:

Michael A. Carpenter, University of Cambridge
Harry Y. (Hap) McSween, Jr., University of Tennessee

Treasurer:

James G. Blencoe, Oak Ridge National Lab

Councilors: (in alphabetical order)

Lukas P. Baumgartner, Johannes Gutenberg University
Rebecca A. Lange, University of Michigan
Barb Dutrow, Louisiana State University
Jean Morrison, University Southern California

*Letter from the President***Profiling**

by Rod Ewing

Profiling, the use of race or ethnicity as a basis for screening a person's intentions, has been much in the news during the past year. Fortunately, common decency and the law require that we look beyond the superficial attributes of an individual before ascribing a motive to his or her actions. Still, profiling has been advocated by some, as in screening airline passengers, because it is "efficient," not requiring as much thought and analysis of the person or the situation. Many, particularly the victims of profiling, vehemently protest the approach because it is offensive to the individual and the

group. Still, the evident human need to group or pigeonhole individuals remains a strong force in the interactions between individuals and their groups or tribes.

I wonder if "profiling" on the basis of scientific discipline is not also part of the same phenomenon. Since I became president of MSA, I have been impressed by the evident need to "profile" sub-disciplines in mineralogy and the historical trend toward dividing into smaller and smaller groups. Some colleagues have expressed concern that we establish a boundary between mineralogy and geochemistry. Evidently, there is a need to have

boundaries, so that one can avoid "crossing-over" to the other side. Others have expressed concern for the lack of balance between "mineralogists" and "petrologists" on committees. Some have worried that we have too many "petrology" papers in the *American Mineralogist*, others are concerned for the lack of enough "mineral physics" papers. For others, the structures of rare minerals seem not to add enough scientific value to the needs of petrology and geochemistry. Mineral physics is generally understood to include research in the high-pressure and high-temperature regimes, but usually is not

taken to include the theory or calculations of low-temperature interactions at the atomic scale across surfaces. Some researchers are dismissed because their work is too "applied"; others are praised because their work is purely "fundamental," but criticized because it is not "relevant." Those who attempt to synthesize global phenomena are too "qualitative." Those who perform precise atomic-scale simulations are too "narrow." I am sure that we all have experienced some unpleasantness from this disciplinary "profiling" and have been guilty of the same. We all suffer the normal human failing of see-

ing all of the details and nuances in our own work, while being entirely comfortable in lumping the work of others into broad categories – with a value judgment attached in added measure. This behavior is so fundamentally tribal, it would be more efficient if we wore identifying feathers and sea shells around our necks so that we could quickly distinguish ourselves from the members of other tribes.

In many ways such behavior is natural for any group or discipline that grows and develops with time, adapting to new opportunities and situations. Historically, the Mineralogical Society of America has spawned other societies, such as the Clay Minerals Society. New journals, such as the *Physics and Chemistry of Minerals* or the *Journal of Petrology*, grew out of the need to find appropriate and welcoming venues for publication as each field expanded to address new questions. As scientific communities grow, it is natural to expect a proliferation of societies and journals. Each group has its own focused interests and publishes for a rather specific audience of practitioners. This is normal, but what is not normal or useful is that this diversification can lead to labels that fragment a discipline, and this is my fear for mineral science.

Even by the broadest definition, mineral science is much too small a field to tolerate this type of fragmentation. If one adds the memberships of the various mineralogical and geochemical societies, the number is probably no more than 5000 (considering that many of us have overlapping memberships). With such small numbers, we simply cannot afford the luxury of dividing into smaller and smaller tribes. We have to constantly redefine who we are and what we do so that we include the widest range of activities in solid-state science. Previous MSA presidents have discussed the declining role of mineralogy in geoscience departments or the declining number of MSA members from North America. I suggest that the declining numbers and lessening impact are, in part, a result of our own narrow definition of the topics appropriate to mineral science.

I can contrast the present state of mineral science with that of materials science, a field that historically has grown out of metallurgy departments, many of which were originally associated with mining engineering departments. The Materials Research Society is just over 25 years old (one of its founders, Rustum Roy at Penn State, was an MSA Awardee). I joined the MRS in 1979; at that time, MRS had approximately 1500 members (fewer than MSA at that time). This year MRS has over 12,000 members. This does not include the members of the eleven MRS-type societies around the world (MRS-Europe, MRS-Russia, MRS-China, MRS-Japan, MRS-India, etc. that comprise the International Union of Materials Research Societies). In contrast to mineral science, the philosophy of MRS is that any topic in solid-state science is fair game for their meetings—electronic materials, biomaterials, metals, polymers, semi-conductors, wood, high pressure mineral physics—the list is only limited by the imagination of meeting organizers. This type of disciplinary diversity is not easily managed, but I am not sure that there is a need to manage the role or place of the different topics within the discipline. The intellectual ferment is well worth the irritation of the clamor of the different voices from

Continued on page 7

The Lattice is published quarterly (February, May, August, November) by the Mineralogical Society of America. It is distributed to MSA members and subscribers as a service. Articles and letters are welcome.

The Mineralogical Society of America is composed of individuals interested in mineralogy, crystallography, and petrology. Founded in 1919, the Society promotes, through education and research, the understanding and application of mineralogy by industry, universities, government and the public.

Membership benefits include: *American Mineralogist*, published bi-monthly; 25% discount on volumes in the *Reviews in Mineralogy and Geochemistry* series; *The Lattice*; special subscription rates for *Mineralogical Abstracts*, *Physics and Chemistry of Minerals*, *Journal of Petrology*, *Rocks and Minerals*, and *Mineralogical Record*; reduced registration fees at MSA short courses; member rates for the MSA/Geological Society of America annual meeting and member rates at MSA's spring meeting with the American Geophysical Union; participation in a Society that supports the many facets of mineralogy.

Dues for 2002: professional members \$50; student members \$5. *American Mineralogist* subscription: members add \$35 (paper and electronic); \$10 electronic. Membership is on a calendar year basis. Individuals who join after January 1, 2002 will be sent all back issues of volume 86 for 2002.

Additional membership information and an application, and/or a price list of the Society's publications are elsewhere in this newsletter, or contact the Business Office.

Institutions may subscribe to the 2002 volume of *American Mineralogist* for the annual rate of \$530 in the US and \$550 for non-US addresses. The subscription price includes any new volumes of the *Reviews in Mineralogy and Geochemistry* series and issues of the *Lattice* published during the calendar year of the subscription. Payment must be received in full before a subscription will be started.

MSA Award and Office and Nominations

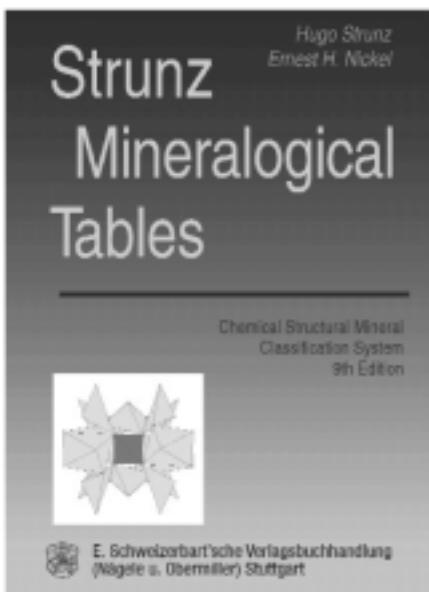

Member participation is essential to the formation and continuation of MSA programs. Involvement can take many forms, but for the moment we are asking you to nominate someone for an award, volunteer to serve on a committee next year, or offer your name or that of a colleague as a possible committee member or candidate for office. It is through the involvement of individual members that the Society's programs develop to meet the needs of its members. Please take a minute to read the brief descriptions below about needed candidates and consider making a nomination. More information about each award and the list of 2002 MSA Officers, Councilors, Committee members, MSA Fellows, and past awardees are available at the MSA website at www.minsocam.org. If there is someone you feel that should appear in one of those lists, and does not, contact the appropriate Committee Chair with your recommendations.

Award/Office	Deadline	Committee Chair
The Roebling Medal is MSA's highest award and is given for eminence as represented by outstanding published original research in mineralogy.	June 1	David L. Bish Geology and Geochemistry Los Alamos National Laboratory, Mail Stop D469 LosAlamos, NM 87545 ph: (505) 667-1165 fax: (505) 665-3285 e-mail: bish@lanl.gov
The Dana Medal is intended to recognize continued outstanding scientific contributions through original research in the mineralogical sciences by an individual in the midst of their career.	June 1	Jeffrey E. Post Mineral Sciences NHB 119 Smithsonian Institution Washington, DC 20560-0119 Tel: (202) 357-4009 Fax: (202) 357-2476 E-mail: post.jeffrey@nmnh.si.edu
Mineralogical Society of America Award is give for outstanding published contribution(s) prior to 35th birthday or within 7 years of the Ph.D.	June 1	Kathryn L. Nagy University of Colorado at Boulder Department of Geological Sciences Campus Box 399 Boulder, CO 80309-0399 tel: (303) 492-6187 fax: (303) 492-2606 e-mail: nagyk@spot.colorado.edu
Distinguished Public Service Medal is awarded for distinguished contributions to public policy and awareness about mineralogical topics.	June 1	Gordon E. Brown, Jr. Stanford University Dept Geol & Environ Sci Stanford, CA 94305-2115 Tel: (650) 723-9168 Fax: (650) 725-2199 e-mail: gordon@pangea.stanford.edu
Society Fellowship is the recognition of a member's significant scientific contributions. Nomination is undertaken by one member with two members acting as co-sponsors. Form required, contact committee chair or MSA home page.	June 1	J. G. Liou Stanford University Dept Geol & Envirn Sci Palo Alto, CA 94305-2115 Tel: (415) 723-2716 Fax: (415) 725-2199 E-mail: liou@pangea.stanford.edu
MSA Office is open to any non-student member or fellow of the Society. One-year terms for President and Vice-President; two-year terms for treasurer and secretary; three-year term for Councilors.	June 1	Craig E. Manning Univ California-Los Angeles Dept Earth & Space Sciences Los Angeles, CA 90095-1567 Tel: (310) 206-3290 Fax: (213) 825-2779 E-mail: manning@ess.ucla.edu
Committee membership is open to any member or fellow of the Society. Terms usually from one to six years. In addition to above committees, there are committees on Meetings, Lecture program, Short courses, Research Grants, Best Paper, Benefactors, Finances, Committees, Outreach, Arts Council open to members. If you are interested in serving, contact the chair.	April 30	Douglas Rumble Carnegie Inst. Strunz Mineralogical Tables

**Chemical Structural Mineral
Classification System**

by HUGO STRUNZ and ERNEST H. NICKEL 2001. X, 870 pages, with 226 figures,
bound, 17 x 24 cm, ISBN 3-510-65188-X, € 148,- / US-\$ 142,-

Mineralogical Tables, first established as *Mineralogische Tabellen* by Hugo Strunz in 1941, have gone through eight editions, numerous reprints and translations. This ninth, completely new English-language edition is fully revised and updated and incorporates a large number of data on new minerals and new data on previously described minerals.

Mineralogical Tables uses a chemical-structural mineral classification system based on the same general principles as those embodied in earlier editions: All minerals are apportioned into one of ten classes according to their principal anionic constituents. Each of these ten classes is then broken down into divisions, subdivisions and groups, based on chemical composition and crystal structure. A simple alphanumeric coding system is applied to the various categories. This coding system has intentional gaps that permit the insertion of new categories of minerals yet to be discovered without disrupting the general classification scheme. The data are presented in tabular form, with minerals grouped by structure type, and include the chemical formula and crystallographic parameters for each mineral, as well as the authors and reference to the original mineral description. Literature references to reports of crystal structure determinations and to the more recent descriptive papers are also provided. Each group is accompanied by a brief description of the crystal structures of the minerals comprising the group, and crystal-structure drawings are given for many of the important structure types.

Audience: Mineralogists, Earth Scientists, serious mineral collectors

President, Continued from page 3
each group.

Where does MSA stand in its effort to include and embrace the different parts of the mineral science community? In fact, we are not doing too badly. As an example consider the recently presented awards of the MSA. We recognized the work and contributions of a petrologist, crystallographer and a crystal chemist. Their degrees, in various combinations, are in geology, physics and chemistry. By our own awkward and Byzantine process, we actually do recognize the work and contributions of a wide variety of disciplines among our peers. Recognition comes more slowly to some than to others. Some never receive their just recognition, and this is our failure to look beyond the stereotypes or tribes of our own sub-disciplines and make a fair and accurate evaluation of the contributions of others. We have to guard against this. We have to be sure that committees are well balanced. But we also have to guard against "profiling" our colleagues in a way that puts distance between their efforts and our own. Good science should look the same regardless of its guise or purpose.

Research is prospering in the solid-state sciences, and the landscape around mineral science has changed. In fact, our disciplinary niche has expanded—but we have to occupy this space, or others will. If you are concerned by the direction that MSA is taking, then play an active role in the Society. By your own effort make the Society what it should be, but do not be surprised if you are jostled by others going in the opposite direction with a different perspective and sense of what is important.

Resist the temptation to "profile". Broaden the scope of mineral science.

Outstanding Students, Continued from page 1

ceives a *Reviews in Mineralogy* or *Monograph* volume chosen by the sponsor, student, or both. Past AMU awardees are listed on the MSA website.

Deadlines for nominating students are January 1 and July 1 of each year. Mark these dates on your calendars and let us know about your exceptional student. If you are interested in presenting the award at a particular ceremony, please remember that time is required to produce certificates and have letters signed. To nominate a student, send a letter on departmental letterhead to Dr. J. Alexander Speer, MSA Business Office, 1015 Eighteenth St. NW Ste 601, Washington, DC 20036-5212, USA. With the nomination, please include the student's full name that would be suitable for the certificate, a mailing address for the student that will be current at the time the award is made, year in school, the MSA sponsor's name, **the choice of Reviews in Mineralogy or Monograph**, and the date and brief description of the award ceremony at which the certificate will be presented. The letter must be signed or co-signed by the department chair.

The Society welcomes the following exceptional students to the program's honor roll and wishes to thank the sponsors for enabling MSA to recognize these outstanding individuals.

American Mineralogist thanks reviewers of 2001

The quality of the journal depends on the hard work and generosity of our reviewers. Reviewers analyze papers for errors and omissions in science methodology, research, explanations, and so on. They determine if the discussion is complete and sensible. They offer advice on the organization and grammar involved with creating a paper the author can be proud of. No one stands alone in science; all authors owe thanks, as we do, for our thoughtful and critical reviews.

2002 Fee Schedule

Memberships are entered and renewed on a calendar basis. You will receive all publications for the year you join. Membership applications received after October 1 will be made effective January 1 of the following year unless you request otherwise. Members will receive the newsletter, *The Lattice*, as part of their dues. As an additional benefit, members may elect to receive the *American Mineralogist*, as well as some related publications, at substantially reduced rates. Please indicate all options that apply in the box to the right. Members are entitled to a 25% discount on other MSA publications given on our Publication List.

Member Dues	US\$50.00
Student Member Dues	5.00
<i>American Mineralogist</i> (paper & online member price)	35.00
<i>American Mineralogist</i> (online member price)	10.00
International airlift for paper <i>American Mineralogist</i>	40.00
Life Membership Dues (with <i>American Mineralogist</i>)	2125.00
<i>Mineralogical Abstracts</i> , published quarterly by the Mineralogical Society of Great Britain & Ireland	58.00
<i>Physics and Chemistry of Minerals</i> , published eight times a year by Springer-Verlag	523.00
<i>Journal of Petrology</i> , published twelve times a year by Oxford University Press	395.00
<i>Rocks & Minerals</i> published 6 times a year by Heldref Foundation \$41.00 (\$51.00 for non-US addresses)	
<i>Mineralogical Record</i> published 6 times a year \$43.00 (\$47.00 for non-US addresses)

Information Form for the *Earth Sciences Speakers Directory*

Yes! I want to advance the public's knowledge of the importance of minerals and the earth sciences. I am willing and able to speak to mineral clubs, Scout groups, museums, schools, etc., about the earth sciences. Please add me to the *Earth Sciences Speakers Directory*. PLEASE TYPE OR PRINT CLEARLY.

Degree/year: _____ Major: _____ College/Univ: _____

Current / most recent employer: _____ Title: _____ Retired? _____

Professional societies: MSA FM GSA SEG SME Other: _____

Topics and Titles of talks, programs, and/or demonstrations which I can give:

Topic	Title of Talk (e.g. Topic="Volcanoes", Title = "Minerals from Mt. St. Helens")
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Please list up to 3 articles you have authored about which you'd be willing to talk to the public:

I'm willing and interested in speaking to the following types of groups:

- General public Rock & Mineral clubs Gem & Mineral shows Museum groups
 Grade schools High schools Professional groups Youth groups (Scouts, etc.)
 Other: _____

Do you require:

Honorarium? Yes No No, but I'd like one! How much? \$_____

Travel expenses? Yes No I'm am not willing to travel more than _____ miles from my home.

Equipment? Slide projector Overhead projector Video player Video projector

I am willing to have the information above listed in the Earth Sciences Speakers Directory.

Print Name: _____ **Signature:** _____ **Date:** _____

Send completed forms to: Dr. Andrew Sicree (Director, Penn State Univ. Museum), Attn: Speaker's Directory, PO Box 10664, State College, PA 16805. Call (814) 865-6427 or email <sicree@geosc.psu.edu> for more info. Please feel free to add additional comments and/or materials such as bio., CV, clippings, other work and speaking experience.

Welcome New Members

The following individuals joined MSA July 17 through November 17, 2001. We welcome them to the Society. The areas of interest are: Mineralogy (MI), Crystallography/Crystal Chemistry (CC), Material Properties (PP), Igneous Petrology (IP), Metamorphic Petrology (MP), Sedimentary Petrology (SP), Geochemistry (GE), Phase Equilibria (PE), Economic Geology (EG), Clay Mineralogy (CM), Industrial Mineralogy (IM), Environmental Mineralogy (EM), Gems (GM), Planetary Materials (PM), Teaching (TC), Topologic Mineralogy (TP), Biological-Mineral Interactions (BM), and others as indicated.

If you know of someone who would like or should join MSA, give them the membership application that appears in this issue of *The Lattice*, or is available from either MSA's web site (<http://www.minsocam.org>) and the MSA Business Office, 1015 Eighteenth St NW Ste 601, Washington, DC 20036-5212, USA.

Jochimski, Dr. Michael M., Univ of Erlangen, In

America's oldest popular magazine about minerals

Amateurs as well as professional scientists delight in and pore over *Rocks & Minerals*, which has published articles on mineralogy, geology, and paleontology since 1926. Regular departments explore such topics as minerals for the collector, microminerals, and current geologic events. Detailed lists of collecting opportunities in specific localities appear periodically, as do special theme issues. Spectacular color photographs appear throughout each issue. *Rocks & Minerals* works with the Mineralogical Society of America to promote cooperation between collectors and professional mineralogists.

Recent articles include:

- *Mineralogy of Point Prospect*, Keweenaw County, Michigan
- *The Rogerley Mine*, Weardale, County Durham, England
- *Mineralogy, Geology, and Mining History of the Telluride District*, San Miguel County, Colorado
- *The Geological Museum*, Johannesburg, South Africa
- *Mineral Collecting in Russia*

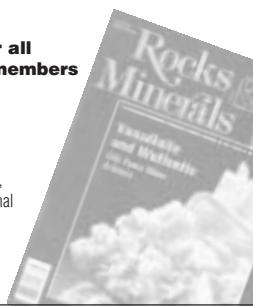

Special Offer

15% off a one-year subscription for all
Mineralogical Society of America members

Yang, Dr. Sanyuan, Univ of California-davis, Dept of Chemical Eng & Mat Sci, 1 Shields Ave, Davis CA 95616-0000. Ph: (530) 754-2132. Fax: (530) 752-9307. E-mail: syyang@ucdavis.edu (M-00). MI, CC, PP, GE, PE, CM, IM, EM, PM, MS, BM,

Young, Ms. Katherine, Univ of Maryland College Park, Dept of Geology, College Park MD 20742-4211. E-mail: ksyoung@wam.umd.edu (S-00). MI, IP, MP, GE, PE, TC,

Zhang, Dr. Hengzhong, Univ of Wisconsin-Madison, Dept of Geology & Geophysics, 1215 W Dayton St, Madison WI 53706-1692. Ph: (608) 262-4983. Fax: (608) 262-0693. E-mail: hzhang@geology.wisc.edu (M-00).

Deadline

Material for the May 2002 Lattice is April 15, 2002. Contributions may be sent to Andrea Koziol via surface mail at the Department of Geology, University of Dayton, Dayton, OH 45469-2364 or via e-mail at koziol@notes.udayton.edu.

IN MEMORIUM

William S. MacKenzie (Senior Fellow -1949)

2002 MSA and GS Short Courses

Phosphates: Geochemical, Geobiological and Materials Importance

October 26-27, 2002

Golden, CO, USA

Short Course organizers: John Rakovan, Matthew Kohn, and John M. Hughes

Meeting: Geological Society of America Meeting

Sponsor: Mineralogical Society of America

Applications of Synchrotron Radiation in Low-Temperature Geochemistry and Environmental Science

December 3-5, 2002

Monterey, CA, USA

Short Course organizers: Paul Fenter, Mark L. Rivers, Neil C. Sturchio, and Steve Sutton

Meeting: Fall American Geophysical Union

Sponsor: Geochemical Society

Plastic Deformation and Deformation Structures of Minerals

December 3-5, 2002

Berkeley, CA, USA

Short Course organizers: Shun-ichiro Karato and H.-R. Wenk

Meeting: American Geophysical Union

Sponsor: Mineralogical Society of America

**Coming in the American Mineralogist:
PRESIDENTIAL ADDRESS**

- 185 Scales of disequilibrium and rates of equilibration during metamorphism
William D. Carlson
- LETTERS**
- 359 Chloride ion sites in silicate and aluminosilicate glasses: a preliminary study by ^{35}Cl solid-state NMR
Jonathan F. Stebbins and Lin-Shu Du
- 364 Nuclear magnetic resonance and infrared spectroscopic study of excess-boron olenite from Koralpe, Styria, Austria
Bernd Marler and Andreas Ertl
- ARTICLES**
- 205 Characterization of coexisting NH_4^+ - and K-micas in very low-grade metapelites
Fernando Nieto
- 217 Effect of sonic and ultrasonic frequencies on the crystallization of basalt
Karen S. Bartels and Tanya Furman
- 227 Sulfur saturation limits in silicate melts and their implications for core formation scenarios for terrestrial planets
Astrid Holzheid and Timothy L. Grove
- 238 Molecular water in beryl, $\text{VIAl}_2[\text{Be}_3\text{Si}_6\text{O}_{18}]\cdot n\text{H}_2\text{O}$, as a function of pressure and temperature: An experimental study
Rainer Pankratz and Klaus Langer
- 245 Fluid-induced nucleation of (Y + REE)-phosphate minerals within apatite: Nature and experiment. Part I. Chlorapatite
Daniel E. Harlov, Hans-Jürgen Förster, and Timo G. Nijland
- 262 X-ray spectroscopic investigations of fluids in the hydrothermal diamond anvil cell: The hydration structure of aqueous La^{3+} up to 300 °C and 1600 bars
Alan J. Anderson, Sumedha Jayanetti, Robert A. Mayanovic, William A. Bassett, and I-Ming Chou
- 269 Fibrous nano inclusions in massive rose quartz: HRTEM and AEM investigations
Chi Ma, Julia S. Goreva, and George R. Rossman
- 277 Polysomatism in högbomite: The crystal structures of 10T, 12H, 14T, and 24R polysomes
Clivia Hejny and Thomas Armbruster
- 293 Ordering of hydroxyl defects in hydrous wadsleyite ($\beta\text{-Mg}_2\text{SiO}_4$)
S.C. Kohn, R.A. Brooker, D.J. Frost, A.E. Slesinger, and B.J. Wood
- 302 The crystal structure and cation ordering of Phase-X ($\text{K}_{1-x-n}(Mg_{1-x})_2(\text{Al},\text{Cr})_n\text{Si}_2\text{O}_7\text{H}_2$): A potential K- and H-bearing phase in the mantle
Franco Mancini, George E. Harlow, and Christopher Cahill
- 307 Feasibility of determining the quantitative OH content of garnets with Raman spectroscopy
Elizabeth H. Arredondo and George R. Rossman
- 312 Raman spectroscopic study of garnet inclusions in diamonds from the mantle transition zone
Philippe Gillet, Violaine Sautter, Jeffery Harris, Bruno Reynard, Benjamin Harte, and Martin Kunz
- 318 Raman spectroscopy of Fe_2O_3 to 62 GPa
Sang-Heon Shim and Thomas S. Duffy
- 327 Study of the (010) olivine surface by Rutherford backscattering spectrometry in channeling geometry
Laurence Lemelle, François Abel, Camille Cohen, and François Guyot
- 333 Equation of state of dense hydrous magnesium silicate phase A, $\text{Mg}_7\text{Si}_2\text{O}_8(\text{OH})_6$
Wilson A. Crichton and Nancy L. Ross
- 339 Si-F bonding in aluminosilicate glasses: Inferences from ab initio NMR calculations
Yun Liu and Hanna Nekvasil
- 347 Monoclinic nearly stoichiometric wüstite at low temperatures
Helmer Fjellvåg, Bjørn Hauback, Tom Vogt, and Svein Stølen
- 350 On the nature of tincalconite
Rudy L. Luck and Ge Wang

A Most Comprehensive Photo CD!

The Photographic Guide to Mineral Species.

An astounding 5400 photographs depicting 3100 different mineral species are pictured in this remarkable CD, four times the number of different minerals seen in any other product! Completely hyperlinked among species names, localities and associations, this outstanding photographic record captures many of the rarely seen, frequently overlooked phases in the mineral kingdom. An invaluable teaching aid and reference work, this multi-featured, dual platform CD will operate in both Windows and Mac operating systems! Only **\$69.95 plus \$5.00** shipping.

The Finest New Books!

Lovozero — by Dr. Igor Pekov.

A comprehensive study of the history, geology and mineralogy of this prolific area of the Kola Peninsula, with nearly 500 pages and fully illustrated with hundreds of color and b/w photos, maps and drawings. Hardcover volume, superbly done, just **\$79.00 plus \$8.00** surface shipping.

Langban — Mines, Minerals, Geology & Explorers.

A superb 215+ page hardcover book printed on exquisite heavy stock that tells the complete story of this prolific Swedish mineral locality. Filled with excellent color photos as well as black and white images of the rich mineralogy and history of this famous area, this book is a long-awaited masterpiece of regional mineralogy that every library should have! Full descriptive mineralogy of the hundreds of species that occur there, with a marvelous historical treatment! Large format (30 x 22 cm), superb printing quality. **\$75.00 plus \$7.00** surface shipping.

The Best Database! Now on CD!

The Fersman Museum Mineral Database.

This excellent software product is a comprehensive database of all approved mineral species. Information for each mineral includes chemistry, mineral group, X-ray data and space group, optical data, other physical properties as well as type locality and literature references! Most importantly, every field or combination of fields is fully searchable! This DOS-based program works well in any Windows environment with an IBM-compatible system. With full installation package and instruction guide, this excellent software is just **\$99.00 plus \$5.00** shipping.

Use your Visa, MasterCard, or American Express card for immediate shipment!

Meetings Calendar 2002

APRIL

1–5 Materials Research Society Spring Meeting. San Francisco, California, USA. Details: Materials Research Society, 506 Keystone Drive, PA 15086-7573, USA. Telephone: 724-779-3003. Fax: 724-779-8313. E-mail: info@mrs.org. Web page: <http://www.mrs.org/meetings/spring2002/>.

MAY

19–24 International Basement Tectonics Association Meeting. Rolla, MO, USA. Details: John P. Hogan, Department of Geology and Geophysics, University of Missouri-Rolla, Rolla, MO 65409-0410. Phone: (573) 364-4618. Fax: (573) 341-6935. E-mail: jhogan@umr.edu

20–24 The Sixth International Symposium on the Geochemistry of the Earth's Surface (GES-6). Honolulu, Hawaii USA. Details: GES-6 Symposium Secretariat, UH Department of Oceanography, 1000 Pope Road, MSB 525, Honolulu, HI USA 96822. phone: +1-808-956-6344; fax: +1-808-956-7112. Email: ges6@soest.hawaii.edu. Web page: <http://www.soest.hawaii.edu/oceanography/ges-6/>

25–30 American Crystallographic Association Annual Meeting. San Antonio, Texas. Details: Wally Cordes. E-mail: wcordes@comp.ualr.edu. Web page: <http://www.hwi.buffalo.edu/ACA/ACA-A nnual/futuremeetings.html>

27–29 47th Joint Annual Meeting of the Geological Association of Canada and the Mineralogical Association of Canada. Saskatoon, Canada. Details: Mel Stauffer, Depart-

ment of Geological Sciences, University of Saskatchewan, 114 Science Place Saskatoon SK Canada S7N 5E2. E-mail: mel.stauffer@usask.ca. Web page: <http://www.usask.ca/geology/sask2002/index.html>

May 28–June 1 AGU 2002 Spring Meeting. Washington, DC. Details: AGU Meetings Department, 2000 Florida Avenue, NW, Washington, DC 20009. Phone: 1-800-966-2481. Fax: +1-202-328-0566. Email: meetinginfo@agu.org.

JUNE

3–7 Zeolite '02. Thessaloniki, Greece. Details: Dr. Panagiotis Misaelides, Assoc. Professor, Department of Chemistry, Aristotle University, P. O. Box 1547, GR-54006 Thessaloniki, GREECE. Tel.: ++30 31 99 77 89, Fax: ++30 31 99 77 53. Email: misailid@chem.auth.gr. Web page: <http://www.chem.auth.gr/activities/zeo2002>

8–13 Annual Meeting of the Clay Minerals Society. Boulder, Colorado, USA. Details: Co-Chair: Kathryn L. Nagy, Associate Professor, University of Colorado at Boulder, Department of Geological Sciences, Campus Box 399, Boulder, CO 80309-0399 Email: nagyk@spot.colorado.edu. Web page: <http://www.colorado.edu/geolsci/cms/>

June 30–July 5 16th Australian Geological Convention. Adelaide, Australia. Details: The Organising Committee, 16th AGC, PO Box 6129, Halifax Street, Adelaide, South Australia 5000 Australia. Tel: +618 8227 0252; Fax: +618 8227 0251. E-mail: 16thagc@sapro.com.au. Web page: <http://www.16thagc.gsa.org.au/>

JULY

21–26 The 65th meeting of the Meteoritical Society. Los Angeles, California, USA. Details: Dr. Paul H. Warren, Institute of Geophysics & Planetary Physics, UCLA, Los Angeles, CA, 90095-1567. phone 310-825-3202, fax 310-206-3051. Email: pwarren@ucla.edu. Web page: <http://www.uark.edu/campus-resources/metsoc/newmeet.htm>.

21–25 9th International Platinum Symposium. Billings, MT, USA. Details: Roger Cooper, Dept. of Geology, Lamar University, P.O. Box 10031, Beaumont, TX 77710, USA. Phone: 409-880-8239. Email: cooperrw@hal.lamar.edu. Web page: <http://www.platinumsymposium.org>.

22–27 11th Quadrennial IAGOD Symposium and GEOCONGRESS 2002. Windhoek, Namibia. Details: The Secretary, IAGOD/GEO-CONGRESS 2002, P.O. Box 44283, Linden 2104, South Africa. E-mail: gssa@pop.onwe.co.za. Web page: <http://www.geoconference2002.com>.

22–26 ICSTR: Fifth International Conference on Solvo-Thermal Reactions. East Brunswick, New Jersey. Details: Professor Richard E. Rimany, Phone 732-445-4946, fax 732-445-6262. email: rimany@email.rci.rutgers.edu Web page: <http://www.ICSTR.rutgers.edu>

AUGUST

6–15 19th Congress and General Assembly of the International Union of Crystallography. Geneva, Switzerland. Details: Congress Secretariat, XIX Congress and General Assembly of the IUCr, P.O. Box

50006, Tel Aviv 61500, Israel. Tel: 972 3 5140000. Fax: 972 3 5140077. e-mail: iucr@kenes.com. Web page: <http://www.kenes.com/iucr/index.html>

17–23 12th V.M. Goldschmidt Conference incorporating ICOG X. Davos, Switzerland. Details: Prof. A. Halliday, Institut fur Min.und Petrographie, ETH-Zentrum, CH-8092, Zurich. Email: halliday@erdw.ethz.ch. Web page: <http://www.goldschmidt-conference.com/gold2002>.

SEPTEMBER

1–6 Mineralogy for the new Millennium (IMA 2002): 18th general Meeting of the International Mineralogical Association. Edinburgh, Scotland. Details: Mr. K. Murphy, Executive secretary, Mineralogical Society of Great Britain and Ireland, 41 Queen's Gate, London SW7 5HR, United Kingdom. Phone: 44 171 584 7516. Email: IMA@minersoc.demon.co.uk. Web page: <http://www.minersoc.org/IMA2002>.

2–3 Transport and Flow Processes within Shear Zones: Joint International Research Meeting of the Tectonic Studies Group, Geological Society of London. London, England. Details: Ian Alsop, Crustal Geodynamics Group, School of Geography & Geosciences, University of St Andrews, Fife, Scotland, KY16 9AL, U.K. E-mail: gia@st-andrews.ac.uk. Web page: http://www.st-and.ac.uk/~www_sgg/tsg2001.html

9–11 Iron Ore 2002. Perth, Australia. Details: Angie Spry, Publications Coordinator. Fax (03) 9662 3662. e-mail: publications@ausimm.com.au. Web page: http://www.ausimm.com/events/event_writeups/ironore.

asp

10–11 Uranium 2002—Uranium deposits from their genesis to their environmental aspects. Prague, Czech Republic. Details: Bohdan Kribek, Czech Geological Survey, Geologická 6, CZ-152 00 Praha 5, Czech Republic. Tel., Fax: +420-2-5817390. E-mail: kribek@cgu.cz. Web page: <http://xrd.cgu.cz/uranium.htm>.

12–14 The Moon Beyond 2002: Next Steps in Lunar Science and Exploration. Taos, New Mexico. Details: David J. Lawrence, Space and Atmospheric Sciences, NIS-1, Mail Stop D466, br. Los Alamos, NM 87545. Phone: (505) 667-0945 Fax: (505) 665-7395. Email: djlawrence@lanl.gov. Web page: <http://www.lpi.usra.edu/meetings/moon2002/>

OCTOBER

6–10 The Minerals, Metals & Materials Society 2002

Annual Fall Meeting. Columbus, OH. Details: TMS Programming Department, 184 Thorn Hill Road, Warrendale, Pennsylvania 15086. Tel. (724) 776-9000, ext. 237; fax (724) 776-3770. E-mail: ckobert@tms.org. Web page: <http://www.tms.org/Meetings/Fall2002/Fall2002.html>.

11–14 Mineral Diversity—Research and Preservation. Sofia, Bulgaria. Details: Organizing Committee, Earth and Man National Museum, 4, Cherny Vrah Blvd., 1421 Sofia, Bulgaria. phone (+359 2) 656 639; Fax (+359 2) 661455. E-mail: mindiv@web.bg. Web page: <http://www.lam.mus.ca/~smmp/meetings.htm>.

27–30 Geological Society of America Annual meeting. Denver, CO, USA. Details: GSA Meetings, Box 9140, Boulder, Colo. 80301-9140. Phone: +1-303-447-2020, ext. 164. Fax: +1-303-447-1133. E-mail: meetings@geosociety.org.

org. Web page: <http://www.geosociety.org/meetings/index.htm>.

DECEMBER

2–6 Materials Research Society Fall Meeting. Boston, MA USA. Details: Materials Research Society, 506 Keystone Drive, PA 15086-7573, USA. Tel: 724-779-3003. Fax: 724-779-8313. E-mail info@mrs.org. Web page: <http://www.mrs.org/meetings/fall2001/>

6–10 AGU 2002 Fall Meeting. San Francisco, CA, USA. Details: AGU Meetings Department, 2000 Florida Avenue, NW, Washington, DC 20009. Phone: +1-202-462-6900 (in D.C. or outside North America) or 1-800-966-2481 (toll-free in North America). Fax: +1-202-328-0566. E-mail: meetinginfo@agu.org. Web page: <http://www.agu.org/meetings>.

Email: meetinginfo@agu.org. Web page: <http://www.agu.org/meetings>.

Member News

Dr. Alexandra Navrotsky, of the University of California at Davis, has been awarded the 2002 Benjamin Franklin Medal in Earth Science. Through its awards program, the Franklin Institute, founded in 1824, seeks to provide public recognition and encouragement of excellence in science and technology. Dr. Navrotsky was cited for her "wide spectrum of accomplishments in crystal chemistry that have contributed to the fields of bonding energies, ceramic and materials research, chemical equilibria, geology, mantle petrology, and thermodynamics. For example, her findings have established the identity of materials at hundreds of kilometers of depth in the Earth that otherwise are inaccessible to direct observation."

The Mineralogical Society of America

announces the 2003

GRANT FOR RESEARCH IN CRYSTALLOGRAPHY

From the Edward H. Kraus Crystallographic Research Fund with contributions from MSA membership and friends

and the 2003

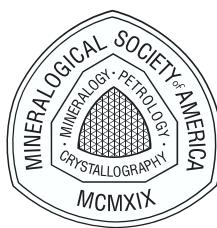

MSA GRANT FOR STUDENT RESEARCH IN MINERALOGY AND PETROLOGY

from an endowment created by contributions from the MSA membership

The Grant for Research in Crystallography is a US\$5000 grant. There are no restrictions on how the grant funds may be spent, as long as they are used in support of research. The only restrictions on eligibility for the grant are that the applicant must have reached his or her 25th birthday but not yet have reached his or her 36th birthday on the date the grant is given, and that the person is not a MSA Counselor.

MSA Grants for Student Research in Mineralogy and Petrology comprise two US\$5000 grants. Students, including graduate and undergraduate students, are encouraged to apply. There are no restrictions on how the grant funds may be spent, as long as they are used in support of research.

Selection will be based on the qualifications of the applicant, the quality, innovativeness, and scientific significance of the research, and the likelihood of success of the project. Grants will be made in January 2003. There are no restrictions on how the grant funds may be spent, as long as they are used in support of research. Application instructions and forms for the grants may be obtained from the MSA home page, <http://www.minsocam.org> or Dr. J. Alex Speer, MSA Business Office, 1015 Eighteenth St NW Ste 601, Washington, DC 20036-5212, USA (ph: 202-775-4344, fax: 202-775-0018, e-mail: j_a_speer@minsocam.org). Completed applications must be received by June 1, 2002.

International Centre for Diffraction Data

Introduces

PDF-4/Minerals 2001

Featuring

- ▼ Over 14,000 entries
- ▼ A powerful user interface that integrates all of the functionality of PCPDFWIN
- ▼ Boolean search capability
- ▼ “On-the-fly” calculation
- ▼ Display of fully digitized patterns derived from ICSD entries
- ▼ CIF output of fully digitized patterns
- ▼ Query results sorted by column headings
- ▼ Multiple tab forms to facilitate organization of query results
- ▼ 13,400 entries with ambient/blank experiment condition flags
- ▼ 12,600 entries with density information
- ▼ 6,600 I/I_c entries
- ▼ 3,100 entries with mineral classification codes
- ▼ 530 distinct mineral classes
- ▼ 1,900 entries with optical property references
- ▼ 1,700 representative structure codes

NEED PORTABILITY?

"THE MINIFLEX™

provides Portable X-ray Diffraction."

Instant information is what everyone wants. From drilling platforms to laboratory desktops, Rigaku's Miniflex™ lets you identify compounds immediately and locally. Difficult problems? Data can be e-mailed to your offsite analytical laboratory. No analytical laboratory? Let Rigaku's contract services help.

The Miniflex™ is made for rugged environments. Miniflex's™ are found at mine sites, in pick-up trucks for mobility, glove boxes for isolation and under graduate laboratories. The low cooling requirements and 110V operation makes it ideal for portable power units. With an outstanding cost-to-performance ratio the Miniflex™ provides data when you need it.
